help of the coach on the field. They must learn that the success of the meet depends upon their co-operation in getting the events started promptly and should always remember that the crowd appreciates good, honest endeavor and disapproves of unsportsmanlike methods.

MEASURING THE TRACK.

Measure the track 12 inches from the inner edge or curb. If the track was built on the eighteen-inch measurement, place marks back from the finish line, as the distance for the different races requires.

Under the old rules, tracks were measured on a line eighteen inches out from the curb. Experiment shows that the athlete runs about only twelve inches from the curb and, in the interest of uniformity, the National Collegiate Athletic Association changed its rules to conform with the International Amateur Athletic Federation rules.

Where tracks are laid out with an 18-inch measurement the difference between the 18-inch and the 12-inch line amounts to 3 feet $1\frac{3}{4}$ inches per lap on a track, no matter how many laps there are to the mile. The following figures will make the re-marking very simple. To find the difference per mile between the two methods of measuring, multiply the number of laps by 3 feet $1\frac{3}{4}$ inches. Thus a

4-lap track equals.....	12 feet	7 inches.
5-lap track equals.....	15 feet	$8\frac{3}{4}$ inches.
6-lap track equals.....	18 feet	$10\frac{1}{2}$ inches.
7-lap track equals.....	22 feet	$\frac{1}{4}$ inch.
8-lap track equals.....	25 feet	2 inches.
9-lap track equals.....	28 feet	$3\frac{3}{4}$ inches.
10-lap track equals.....	31 feet	$5\frac{1}{2}$ inches.
11-lap track equals.....	34 feet	$7\frac{1}{4}$ inches.
12-lap track equals.....	37 feet	9 inches.
13-lap track equals.....	40 feet	$10\frac{3}{4}$ inches.
14-lap track equals.....	44 feet	$\frac{1}{2}$ inch.
15-lap track equals.....	47 feet	$2\frac{3}{4}$ inches.

By placing marks on the track 3 feet $1\frac{3}{4}$ inches apart for every lap run, that distance will be added. It will be much better to correct one curve of the track by increasing the tangent or straight portion of the track a distance of 1 foot $6\frac{3}{4}$ inches, thereby shifting the center point of one of the curves to that extent.

1939 COLLEGIATE HONOR ROLL

The Collegiate Honor Roll is based on performances by eligible college men in the season of 1939. The ranking is determined by vote of the Rules Committee and representative coaches from all sections.

CROSS-COUNTRY RUNNING

In order to have results appear in this book, it is necessary that results of championship runs as well as dual, triangular and invitational meets held under auspices of N.C.A.A. colleges be sent immediately after meets to K. L. Wilson, Northwestern University, Evanston, Illinois. With this co-operation, the committee hopes to see the cross-country section grow in size and interesting content. The book goes to press not later than December 1st of each year.

Second Annual N.C.A.A. Cross-Country Championship and 14th Annual Central Collegiate Conference Cross-Country Run

1939 Junior College Honor Roll

Compiled by Oliver E. Byrd.

Reports on outstanding Junior College performances should be forwarded to Hilmer G. Lodge, Secretary National Junior College Athletic Association, Box 3006, Stanford University, California. Each report should include full details as to the name of athlete, the event, the meet in which the mark was made, weather conditions, etc. Applications for National Junior College records should also include the names of officials, surveyor's report, in addition to the information required for Honor Roll approval. In track events first place times will be the only ones considered for Honor Roll recognition; first places in preliminary heats will be considered.

The Interscholastic Track and Field Program

By E. A. Thomas.

New national high school records were set during the season of 1939 in the high hurdles and the pole vault, but the significant results of the season are indicated in the increased number of high class performances turned in by boys all over the country. A glance at the Honor Roll will show that from New England to California, from Minnesota to Texas, and all states between, have come reports of championship marks set by boys in high schools large and small.

The remarkable hurdling and high jumping records of Joe Batiste of Tucson (Arizona), Negro athlete, stamp him as one of the greatest track and field athletes of all time, and few University men can equal the pole vault marks of Linta, the Mansfield (Ohio), vaulter. Lack of room prevents the inclusion of many really high class performances in the Honor Roll. When high school boys with marks of 9.9 and 22.0 in the dashes, 50 flat in the 440, 2:00 in the half, and 4:30 in the mile are not good enough for the list, it is evident that the material for college and university track teams is abundant.

Never has there been such interest in high school track and field athletics as there is at the present time. New tracks and stadia, better coaching, improved methods of staging meets, and more attractive environments, have all played their part in luring more boys into events which emphasize individual performance and in creating spectator and newspaper interest.

Last year was the first in which the new high school discus was the official implement for the discus throw. It is smaller and lighter than the collegiate discus and is much easier for high school boys to handle. The best records with the new discus compare favorably with those made by college stars with the heavier implement. Some coaches are not sold on it as yet and think the change was too radical. Tests and experiments indicate, however, that it is about right for the average high school boy. A few have suggested that both implements be used and in the more important meets provide opportunity for schools to enter contestants in the senior and junior discus events. Within a year or two we shall know considerably more about the advisability of any further changes.

The 39-inch high hurdle for high school boys has proved to be very popular and the number of prospective hurdlers has increased tremendously since the change in specifications was adopted. Just now we don't know exactly where we stand in regard to the 200 yards low hurdle race. Studies and experiments are under way now under the direction of university graduate departments and we hope to have something definite to present to the National Collegiate A.A. rules committee at its next session. Many maintain that the distance of eighteen yards between hurdles is too short and that if any modification of the old distance is necessary the best way will be to shorten the race to include only eight hurdles, but to keep the distance between them twenty yards. Claims are made that high school low hurdlers tire at the finish of the race and that the former space between hurdles will be found to be satisfactory if the distance of the whole race is lessened.

A few years ago there was some agitation to shorten many of the race distances and to eliminate the longer distances altogether. Improved training facilities apparently have removed most of the objection to distance running for high school boys. The solution seems to lie in better coaching and handling of boys rather than in changing the distances they run. It has been proved beyond reasonable doubt that those high school boys who have the proper background and training for distance running can do it without any detrimental effects.

Source material for the national Honor Roll appears to be plentiful now. State association executive officers have cooperated in sending results of their state meets and other material for the Honor Roll. In addition to these men, scores of other reliable correspondents send information and material regularly from all sections of the country. College and university coaches are taking more interest in high school track and field activities and the outlook for the future is very promising.

1939 NATIONAL INTERSCHOLASTIC HONOR ROLL

Compiled by E. A. Thomas.

The writer has endeavored to collect the results of all state high school meets and other important meets throughout the country and from these results has compiled an honor roll. The best recorded performances worthy of record during the 1939 season should be reported to E. A. Thomas, 204 National Reserve Building, Topeka, Kansas.

It is difficult to compare the performances of boys in different sections of the country because of the variation in weather conditions. Some of the best performances recorded,

were made either under ideal conditions or when there was a slight wind blowing to aid the runners. In some events the records from certain sections do not show up so well because of adverse weather conditions on the dates of the boys' who meets. For these reasons perhaps some of the boys whose records do not show up so well are really better than those who show up better on paper. The following records should, therefore, not be taken too seriously, but the boys who made them are good performers just the same.

National Interscholastic Records

The National Federation of State High School Athletic Associations has appointed a committee on interscholastic records. This committee will receive claims for all interscholastic records in track and field events. For the present the committee recognizes the records herewith, but reserves the right to make any necessary changes. Claims for records should be sent to the committee secretary, C. W. Whitten, Manager Illinois High School Athletic Association, 11 South LaSalle Street, Chicago, Ill., who will upon request furnish official blanks for the presentation of the claims.
