CROSS-COUNTRY RUNNING

In order to have results appear in this book, it is necessary that results of championship runs as well as dual, triangular and invitational meets held under auspices of N.C.A.A. colleges be sent immediately after meets to K. L. Wilson, Northwestern University, Evanston, Illinois. With this co-operation, the committee hopes to see the cross-country section grow in size and interesting content. The book goes to press not later than December 1st of each year.

Third Annual N.C.A.A. Cross-Country Championships and Fifteenth Annual Central Collegiate Conference Cross-Country Run

Best Records Made by American College Men

The National Collegiate Athletic Association has a Records Committee whose duty it is to pass upon all claims for new records. In case of a claim for a record, the parties concerned should communicate with Mr. A. A. Stagg, College of the Pacific, Stockton, Calif., the Chairman of the Committee.

The attached list of best records made by American college men, while they were undergraduates or since they have left college, has been passed upon and accepted by the National Collegiate Athletic Association Records Committee. With few exceptions the holders of world records were college athletes. Events indicated with star (*) are best college records only; all others are accepted world records except those indicated with a dagger (†), which are not I.A.A.F. records.

1940 Junior College Honor Roll

Compiled by Hilmer G. Lodge.

Reports on outstanding Junior College performances should be forwarded to Hilmer G. Lodge, Secretary National Junior College Athletic Association, Santa Maria Junior College, Santa Maria, California, by July 15, to be on the 1941 honor roll. Each report should include full details as to the name of athlete, the event, the meet in which the mark was made, weather conditions, etc. Applications for World Junior College records should also include the names of officials, surveyor's report, in addition to the information required for Honor Roll approval. In track events, first place times will be the only ones considered for Honor Roll recognition; first places in preliminary heats will be considered.

Unless otherwise noted, location of Junior College is in California.

The Interscholastic Track and Field Program

By E. A. Thomas.

A glance at the new Honor Roll containing performances by the high school youngsters of the 1940 season will prove to the most skeptical that wonderful improvement has been made during the past few years. The Honor Roll of ten years ago does not compare with that of this year, so far as the general performance of the best high school athletes is concerned.

Track and field athletics among high schools have received a new impetus through the construction of hundreds of new cinder tracks throughout the United States and the improved performances of a larger number of athletes reflect the importance of these better facilities.

At the track and field clinic held in connection with the meeting of the N.C.A.A. rules committee at the University of Minnesota last June, a great deal of time was devoted to a discussion of the high school program. Coach Karl Schlademan of Washington State was in charge and he prepared a very stimulating and educational program. The high school hurdle races came in for much discussion. Nearly all were agreed that the new 39-inch high hurdle is better for high school boys. It was also pretty well agreed that the 200 yards low hurdle race, with hurdles 18 yards apart, is not altogether satisfactory. Since there is no agreement, however, that the present low hurdle race in the college program is right, the opinion seemed to prevail that a complete study should be made of both low hurdle races and a report should be made concerning the advisability of changing both. There is strong sentiment against the present 220 yards low hurdle race for college athletes, the argument against it being that it is not a hurdle race at all and that any good sprinter can beat a good hurdler who is not also a real sprinter. In other words, hurdling technique plays very little, if any, part in winning races in the low hurdles. The final outcome might be that the high schools will go back to the 20 yards distance between hurdles, with the race shortened, and the colleges will adopt a hurdle three feet high.

The friendly co-operation of the college and university coaches who are members of the rules committee has been helpful and a continuation of the present policy will do much to increase still further the universal interest in track and field athletics for high school boys, as well as college athletes.

In such states as California, Texas, Pennsylvania, Ohio, Indiana, Kansas, and others, track and field athletics hold second position as the most important high school sport. That is, there are more high schools participating in track than in any other sport, probably with the exception of basketball in most states and perhaps football in such a state as Texas.

There is considerable agitation among the high school coaches of some sections to discontinue the discus and javelin events. At present there are too few events in which the strong and heavy boys can compete. Safety in the discus and javelin events is largely a matter of supervision and local management. In practice sessions and meets in which those in charge make the necessary preparations and provide the required safeguards, there is no call for elimination of these events. The slipshod manner in which a very large number of coaches and directors handle their meets and practice sessions is the cause of the agitation for discontinuance. Those who are interested in saving these fine events for high school youngsters should get busy and create some interest among sports lovers in those boys who are not able to win points by running or jumping. The trend seems to be to eliminate any event that will develop the upper part of the body, all others except the shot put being leg events. Why not devote a little attention to the creation of an all-round program that will include boys of all types?

1940 NATIONAL INTERSCHOLASTIC HONOR ROLL

Compiled by E. A. Thomas.

The writer has endeavored to collect the results of all state high school meets and other important meets throughout the country and from these results has compiled an honor roll. The best recorded performances in each event during the 1940 season are listed. Performances worthy of record during the 1941 season should be reported to E. A. Thomas, 409 National Reserve Building, Topeka, Kansas.

It is difficult to compare the performances of boys in different sections of the country because of the variation in weather conditions. Some of the best performances recorded,

were made either under ideal conditions or when there was a slight wind blowing to aid the runners. In some events the records from certain sections do not show up so well because of adverse weather conditions on the dates of important meets. For these reasons perhaps some of the boys whose records do not show up so well are really better than some who show up better on paper. The following records should, therefore, not be taken too seriously, but the boys who made them are good performers just the same.

National Interscholastic Records

The National Federation of State High School Athletic Associations has appointed a committee on interscholastic records. This committee will receive claims for all interscholastic records in track and field events. For the present the committee recognizes the records herewith, but reserves the right to make any necessary changes. Claims for records should be sent to the committee secretary, H. V. Porter, 7 South Dearborn Street, Chicago, Ill., who will upon request furnish official blanks for the presentation of the claims.
