MISCELLANEOUS

Stanford Track: Completely renovated this season, the Stanford track is composed of volcanic crushed rock mixed with decomposed granite and tidal clay. For the State Meet, there will be nine 36 inch lanes.

Turns: All races, 440 yard and over, will be run around two turns per 440. Two competitors will be assigned according to times posted in section meets, with the 440 runners holding their lanes all the way. In the 880 and mile, the runners may break for the pole as they come off the second turn.

Orinda Prep Farmer

By Al Moss

The pros and cons of Northern California high school track, especially when compared to the southern part of the state, can be debated from now until doomsday, but at least the northerners have one solid champion.

His name is Dixon Farmer. Southern Californians have seen, and are very apt to remember Farmer, the senior flash from Orinda's Miramonte High. He won the state 440 title last year with a :48.6 clocking, making up a huge amount of ground in the final 200 yards to capture it, and then came back to lose a photo-finish in the low hurdles in a fine :19.1.

Track fans need only take a look at Farmer's current marks to appreciate his ability and versatility. He has the best marks in the area in three events with a hot :48.2 quarter mile, two full seconds faster than any other northerner; a 1:54.6 half mile, run as a relay leg; and a :19.5 low hurdles.

In addition, he has run the high hurdles in :15.0, second best and done in his only competitive flight of highs this season; and ranks in the broad jump at 22-10, second by a scant inch.

FULL PRAISE

It is no wonder, then, that almost every track coach who has seen him praises Farmer.

"He is without question the finest and most versatile high school trackman I have ever seen," says Palo Alto's Forest Jamieson, the brilliant distance coach.

Farmer, incidentally, has also turned in some good distance times, including a third to Palo Alto's George Linn and Mike Lehner in last year's north coast section cross-country, a race in which all three broke Keith Wallace's old record; and a 4:20 1500 meters at the tail end of

The 4:20, the equivalent of approximately a 4:35 mile, enabled the handsome 5-11, 175-pound athlete to boost his personal decathlon best above 6300 points, good for anyone and outstanding for a high schooler

The versatile Farmer also is a six-foot high jumper, around 12 feet in the pole vault, runs the 100 in :09.9 and so forth through almost any event you'd care to mention.

NOT BIG

In fact, about the only thing that keeps Farmer from challenging the world's best in the decathlon is his lack of size. His marks in the shot put, discus and javelin are under par. As an example of his prowess, however, he is very close to even the great Rafer Johnson, world decathlon record holder, in several events and surpasses the world's leading

DIXON FARMER

decathlon men with his 4:20 1500 meters time.

Dixon won't stay with one event long enough for coaches to determine just what is his best.

Off last year's performances, the 440, low hurdles and broad jump (which he passed up in state meet qualifying) seem to be his top events, but Berkeley coach Rich Hacker, among others, praises him as a potential great half-miler and predicts he'll win the state 880 and run under Don Bowden's interscholastic record of 1:52.3, and perhaps even under 1:50 flat.

The half seems to be the a gruelling decathlon last summer.

event Farmer has concentrated on this year, so he may be shooting for that national mark.

But whatever events he goes in, don't bet against him. Farmer has a competitive desire to match his ability, and even against Southern California, which annually produces the finest high school trackmen in the world, Dixon stacks up.

Jack of All Trades

Farmer, State Meet Star, Is Oxy Bound

By SYD RUSSELL

Dixon Farmer, the one man track and field team from Orinda's Miramonte, who repeated as 440 champion and also captured the 180 low hurdles in the State meet at Bakersfield Friday, will enroll at Occidental next fall, he disclosed yesterday.

Farmer, who just might have won the team title all by himself if a tender heel hadn't kept him out of the broad jump, which was won with a so-so 23-5 $\frac{3}{4}$, said that he had been approached by representatives of several colleges, "but wasn't interested because I decided, long ago, that Oxy was the school for me."

Had the East Bay phenom gone into the broad jump and equaled his best mark in that event, 23-4 $\frac{3}{4}$, he would have tied Long Beach's Poly, which scored 15 points, for the crown.

As he was, he tallied 10, which was good enough for fourth place, along with Los Angeles' Jordan.

PACER HELPED

One of the meet's other headliners, Dale Story of Orange, who peeled 2.3 seconds off the Nataional Interscholastic mile record with a 4:11 clocking, attributed his performance to El Cajon's Jack Hudson "because he really went out there and set a great pace."

Story also said that the big electric timer that was situated at the west end of the arena helped him get the job done.

When the mile race began, the old mark—4:13.4—was on the clock and as the race progressed, the figures kept getting smaller and smaller.

When Story, who took the lead going into the last 440, came off the far turn—his back to the timer—the fans kept him informed of his progress by shouting out the

number of seconds that remained.

DARONE THIRD

The five first finishers in the mile were under the old State standard, 4:20.

A review of the records revealed that Pittsburg's Vince Darone placed third, not fourth, in the 120 high hurdles.

Although they found the going very rough, San Francisco's representatives turned in creditable performances, considering the fact that most of them are juniors.

Back for more next year will be Isaac Woods (Washington), 100 and 220; Dave Williams (Poly), 440; Tony Ferrigno (St. Ignatius), pole vault, and Alex Darnes, (Poly), discus.

PAGING THE PREPS

By
DICK O'CONNOR

Miramonte's Dixon Farmer excels because of 'little extra effort'

Former San Jose State football coach Bob Bronzan always said the difference between being good and great was a little extra effort.

Dixon Farmer of Miramonte High School gives that little extra effort. That's why he's great.

Farmer showed Midpeninsula track and field fans his versatility by winning the outstanding individual performer trophy at the Palo Alto Easter relays in Stanford Stadium earlier this week.

Farmer ran a half mile in 1:54.7, won the 120-yard high hurdles in 15.0 and took second in the broad jump with a leap of 21-1.

DIXON IS JUST starting to round into form. He is aiming at a peak performance in the state meet at Bakersfield in May.

He always puts his best foot forward in the annual classic. And he puts it forward faster than most other entrants, too.

Two years ago in the North Coast Section finals at Berkeley, Farmer, a sophomore, won the Class B title for Miramonte with a first in both hurdles races and a third in the high jump.

Last year at Long Beach Farmer placed fourth in the varsity division with a win in the 440-yard dash and a second in the low hurdles.

LAST FALL Farmer turned to cross country as a conditioning for the track season. He placed third in the NCS meet at the end of the season.

Dixon hasn't tried the weight events yet. He isn't big (5-11, 165) but that probably wouldn't stop him.

Bert Nelson, publisher of Track and Field News, and Forrest Jamieson, coach at Palo Alto High School, both say Farmer can be a future United States decathlon champion.

Why? Because, both Nelson and Jamieson agree, of "a little extra effort."

★ ★ ★
ALREADY THE clamor has started for more Easter baseball tournaments. There were three this year and some teams still didn't have a chance to get in one.

Coach Frank Bettencourt of Menlo-Atherton, who hooked up with the Menlo Park Recreation Department to put on a highly successful eight-team show, has three new teams after spots in his next year's affair.

Bill Hurst of Carlmont wants in for his Scots, Palo Alto and St. Francis of Mountain View also have expressed a desire to get in.

Bettencourt will have defending champion Sequola back next year. M-A, as host, also will be in. Sacred Heart and Lincoln will be back.

The other four spots are open. Bettencourt would like to

ONE-MAN TEAM

rotate South Peninsula Athletic League teams. This would give natural rivals like Ravenswood, Woodside and Palo Alto a chance to compete.

Bettencourt is also considering a split week schedule for next year. Pitchers would have a chance to rest. Willow Glen found out the hard way that one top pitcher isn't enough to win a tourney.

★ ★ ★

Here are the first of the Times weekly awards for outstanding performance in spring sports. Each week three stars will be selected by the Times sports staff.

This week's winners are:

★ **DOUG SCHOENWETTER**, Fremont High School. Doug hit 52-2 in the shot put and 152-6 in the discus in the Easter Relays to post top Midpeninsula marks in both events for the season.

★ **MEL KAHN**, Los Altos High School. Mel banged out three hits in one game for the Knights and played errorless ball in the field in the M-A Easter baseball tourney. He was named to the all-tourney squad for his play.

★ **RIC BRADY**, Palo Alto High School. Ric clipped more than seven seconds off his previous best time for the mile run to start Paly on the way to a new national four-mile relay record. Brady's time was 4:30.4.

BEENAYAN HAS a 164-foot toss to give him an edge on three other superb throwers.

Doug Schoenwetter, Fremont of Sunnyvale; Barry Rothman of Capuchino of Daly City; and Dave Nickel of Washington of Centerville, all have passed the 150-foot mark.

Schmitt is in against Dixon Farmer, California's top all-around track man. Farmer, a 14.9 high hurdler, also is entered in the broad jump and 100-yard dash.

He joins with three other Miramonte High School runners for the sprint medley relay.

LAST YEAR IN the state track meet at Long Beach, Farmer, by himself, placed fourth among more than 100 schools.

At Berkeley in 1958, Farmer single-handedly won the North Coast Section title for Miramonte.

He has been called the successor to Rafer Johnson of UCLA as U.S. decathlon champion.

Mike Nichols of Cubberley and Steve Gray of Washington, both all-league basketball players, hook up in a high jump battle. Both have cleared 6-2.

Lynn Gold of Camden, the favorite in the event, will not compete. School rules forbid the track team from competing during the Easter recess.

Jeff Fishback of San Mateo leads a pack of 24 runners away from the starting line in the two-mile run to open the program. He is favored to win.

The only man who doesn't want to see any records set is Jupe Pluvius. The weatherman, however, predicts partly cloudy skies with a 12-15 mile breeze for the meet.

No rain is expected.

Wins Examiner Award

Farmer Best Prep of 1959

By SYD RUSSELL

Miramonte's Dixon Farmer, jack of all track and field trades and master of many, is the winner of The Examiner's Northern California High School Athlete of the Year Award.

The 18 year old Farmer, who stands 5-11½ and weighs 158, is one of the few "one sport" preps to be accorded the honor—highest of its kind in the state.

He was selected by the votes of more than 250 coaches who cover an area that stretches from Bakersfield to the Oregon border and the Nevada line to the Pacific.

Farmer won by an overwhelming margin despite the fact the 1958-59 school year produced a bumper crop of outstanding all around athletes.

Actually, Farmer, who scored enough points to give his Matadors fourth place ties in the last two State meets, is a pretty handy fellow with a football and basketball. But, in order to concentrate on track and field, he didn't take those sports too seriously.

DOUBLE WINNER

It goes without saying that Farmer earned most of the aforementioned votes for his scintillating performance in the recent State finals at Bakersfield. There, he successfully defended his 440 yard title and won the 180 yard low hurdle race in :48.6 and :19.2, respectively.

Had not an inflamed tendon in his right foot kept him out of the broad jump, which was won with a so-so leap of 23-5¾, it was quite possible that he would have scored enough points to win the CIF team title all by himself.

Miramonte's pride and joy will matriculate at Occidental next fall and hopes to qualify for the United States' next Olympic Games team as a 400 meter hurdler.

NOT BIG ENOUGH

He said he was thinking of trying out for the decathlon, however, decided against it because "I'm not big enough to do much in the weight events." Last winter he captured the septathlon, sponsored by the Track and Field Association, which was open to all Northern California athletes.

As a basketballer, Farmer was good enough to make the Matadors' first string four years straight. However, he only stayed with that team for half a season in order to switch over to track and field. He also was a starter (half-back) on the grid squad as a freshman and sophomore.

An A and B student, he plans on majoring in journalism at Occidental. A former editor on his school's newspaper, he wants to be a sports writer.

Oerter Cracks Discus Record

PELHAM MANOR (N. Y.), June 6. — (AP) — Olympic champion Al Oerter got off a discus throw of 184 feet ½ inch today to break the meet mark in the 163rd annual New York A. C., spring track and field games at Travers Island.

Oerter, former Kansas Star, set the Olympic record in 1956 with 184-10½.

John Lawlor, Boston University senior from Dublin, Ireland, won the hammer throw at 202 feet 6 inches. Lawlor set an IC4A record last weekend at 208-8½.

Tom Murphy, NYAC, won the 880 in 1:53.1.

DAD WAS ATHLETE

Farmer's father, Richard, also was an outstanding athlete and was, while a sophomore at the University of Minnesota, being touted for All-American football honors. A knee injury cut Mr. F's gridiron career short.

Dixon's brother, David, is a freshman at Miramonte and already is making a name for himself as a footballer and wrestler.

Farmer and the yet to be named San Francisco Prep Athlete of the Year, will receive handsome rings from The Examiner at Golden Gate Park's Big Rec Field July 5, just before the start of the all-star game that annually climaxes this newspaper's Baseball School.

Others who scored heavily in the balloting included Ron Snidow, San Rafael; Daryl Lamonica, Clovis; LeRoy Whittle, Berkeley; Jim Fregosi, Serra; Ed Thomas, McClymonds; Vince Darone, Pittsburg; Dale Clifton, Sonora; John Kirby, Santa Cruz; Jerry Eilers, St. Vincent's of Petaluma; Bob Olson, Hilmar, and Mickey Ording, St. Mary's of Berkeley.

Farmer holds nearly every track and field record at the Orinda school with these marks:

- 100—:09.9.
- 220—:21.6.
- 440—:48.2.
- 880—1:57; 1:54.6 (relay log).
- Mile—4:34.9.*
- 2 Miles—:10.05.**
- 5,000 Meters—:16.20.**
- Broad Jump—23-6.
- High Jump—6-1¼.
- 180 Low Hurdles—:19.0.
- 120 High Hurdles—:14.3.
- Discus—132-0.*
- Shot Put (12 pound)—42.8.*
- Shot Put (15 pound)—36-6.**
- Javelin—168-10.**

*Not recognized because not recorded in school competition.

**Unofficial record because event is not contested by school.

Here's Californian's Track Handicap

California's track handicappers are busy at work today, trying to predict the winners of the races that will be held at the various tracks throughout the state. The handicappers are using a variety of methods to make their predictions, including looking at the horses' past performance, the jockeys' records, and the track conditions. Some handicappers also use computer programs to analyze the data and make their predictions. The results of the handicappers' predictions are often used by bettors to make their bets. However, it is important to remember that track handicapping is a highly competitive and often unpredictable business. No handicapper can guarantee a win, and bettors should always gamble responsibly.

Several California tracks have announced that they will be holding special events in the near future. These events will feature some of the state's top horses and jockeys, and are expected to draw large crowds of spectators. The tracks are also planning to offer a variety of betting options to their patrons, including exotic bets and live betting. These events are expected to be some of the most exciting of the season.

The California Horse Racing Board (CHRB) has announced that it will be implementing a new set of rules for track handicapping. These rules are designed to make the handicapping process more transparent and fair to all participants. The new rules will require handicappers to disclose their methods and sources of information, and will also establish a system for resolving disputes. The CHRB is committed to ensuring that the track handicapping process is conducted in a fair and ethical manner.

California's track handicappers are also keeping a close eye on the latest news and developments in the industry. This includes monitoring changes in track conditions, the arrival of new horses and jockeys, and the results of recent races. Handicappers are also staying up-to-date on the latest betting trends and strategies. By staying informed, handicappers can make more accurate predictions and help their bettors make better bets.

The track handicapping industry in California is a highly competitive and fast-paced business. Handicappers are constantly working to improve their skills and stay ahead of the competition. This involves a combination of hard work, research, and a bit of luck. While there is no sure way to win at track handicapping, those who are dedicated and knowledgeable can often find success. The industry is also a source of excitement and entertainment for many Californians, and is an important part of the state's racing culture.

California's track handicappers are also playing a key role in promoting the state's racing industry. By providing accurate predictions and analysis, they help to attract bettors and spectators to the tracks. This, in turn, helps to generate revenue for the tracks and the state. Handicappers are also involved in various community and industry events, and are working to ensure that the racing industry remains a vibrant and successful part of California's economy.

The track handicapping industry in California is a dynamic and ever-changing one. Handicappers are constantly adapting to new challenges and opportunities, and are working to ensure that the industry remains a fair and exciting one for all. As the industry continues to grow and evolve, it is clear that California's track handicappers will continue to play a vital role in the state's racing culture.

California's track handicappers are also using a variety of tools and techniques to make their predictions. Some handicappers use computer programs to analyze the data and make their predictions. Others use traditional methods, such as looking at the horses' past performance and the jockeys' records. Some handicappers also use a combination of these methods. This involves a combination of hard work, research, and a bit of luck. While there is no sure way to win at track handicapping, those who are dedicated and knowledgeable can often find success. The industry is also a source of excitement and entertainment for many Californians, and is an important part of the state's racing culture.

California's track handicappers are also playing a key role in promoting the state's racing industry. By providing accurate predictions and analysis, they help to attract bettors and spectators to the tracks. This, in turn, helps to generate revenue for the tracks and the state. Handicappers are also involved in various community and industry events, and are working to ensure that the racing industry remains a vibrant and successful part of California's economy.

The track handicapping industry in California is a dynamic and ever-changing one. Handicappers are constantly adapting to new challenges and opportunities, and are working to ensure that the industry remains a fair and exciting one for all. As the industry continues to grow and evolve, it is clear that California's track handicappers will continue to play a vital role in the state's racing culture.

California's track handicappers are also using a variety of tools and techniques to make their predictions. Some handicappers use computer programs to analyze the data and make their predictions. Others use traditional methods, such as looking at the horses' past performance and the jockeys' records. Some handicappers also use a combination of these methods. The results of the handicappers' predictions are often used by bettors to make their bets. However, it is important to remember that track handicapping is a highly competitive and often unpredictable business. No handicapper can guarantee a win, and bettors should always gamble responsibly.
