EXCLUSIVE OFFICIAL WATCH FOR THE 1960 OLYMPICS AT SQUAW VALLEY

At Squaw Valley, Longines timing instruments manned by Longines technicians turned in a faultless performance. This repeated the experience at the III Pan American Games held in Chicago in 1959 where the full program of Olympic events was timed by Longines with similar perfection. The direct cost to Longines for timing these two events, in excess of \$150,000, we consider as a contribution to the cause of sport and international good will, the goal of the Olympic movement.

*A Longines-Wittnauer Product*

## HAIL THE CHAMPIONS!

*To the men and women seeking to represent the United States in the XVII Olympiad—a salute from Chevrolet. Our hearty wishes that your diligence in training will be rewarded with a place on the team. We, at Chevrolet, pursuing another goal, are doing our utmost in the competitive tradition. Our aim is to produce truly outstanding automobiles for the growing family of Chevrolet owners—the largest owner group in the world! Again we say to you: Good Luck! Chevrolet Division of General Motors.*

THERE'S NOTHING LIKE A NEW CAR . . . AND NO NEW CAR LIKE THE 1960 BUICK

# THE TURBINE DRIVE BUICK '60

Today's Buick gives you a sense of command and well being on the road that can be felt in no other car—simply because its numerous extra quality features are built into no other car. For instance, Buick alone offers you: the jet-smoothness of Turbine Drive Transmission †, the unsurpassed safety of aluminum-drum brakes, the efficiency and economy of Wildcat V-8 engines, the clarity of an adjustable "Mirromagic" instrument viewer, the con-

venience of an exclusive automatic "Twilight Sentinel" headlight control\*, the deeper cushioned comfort of rich new interiors.

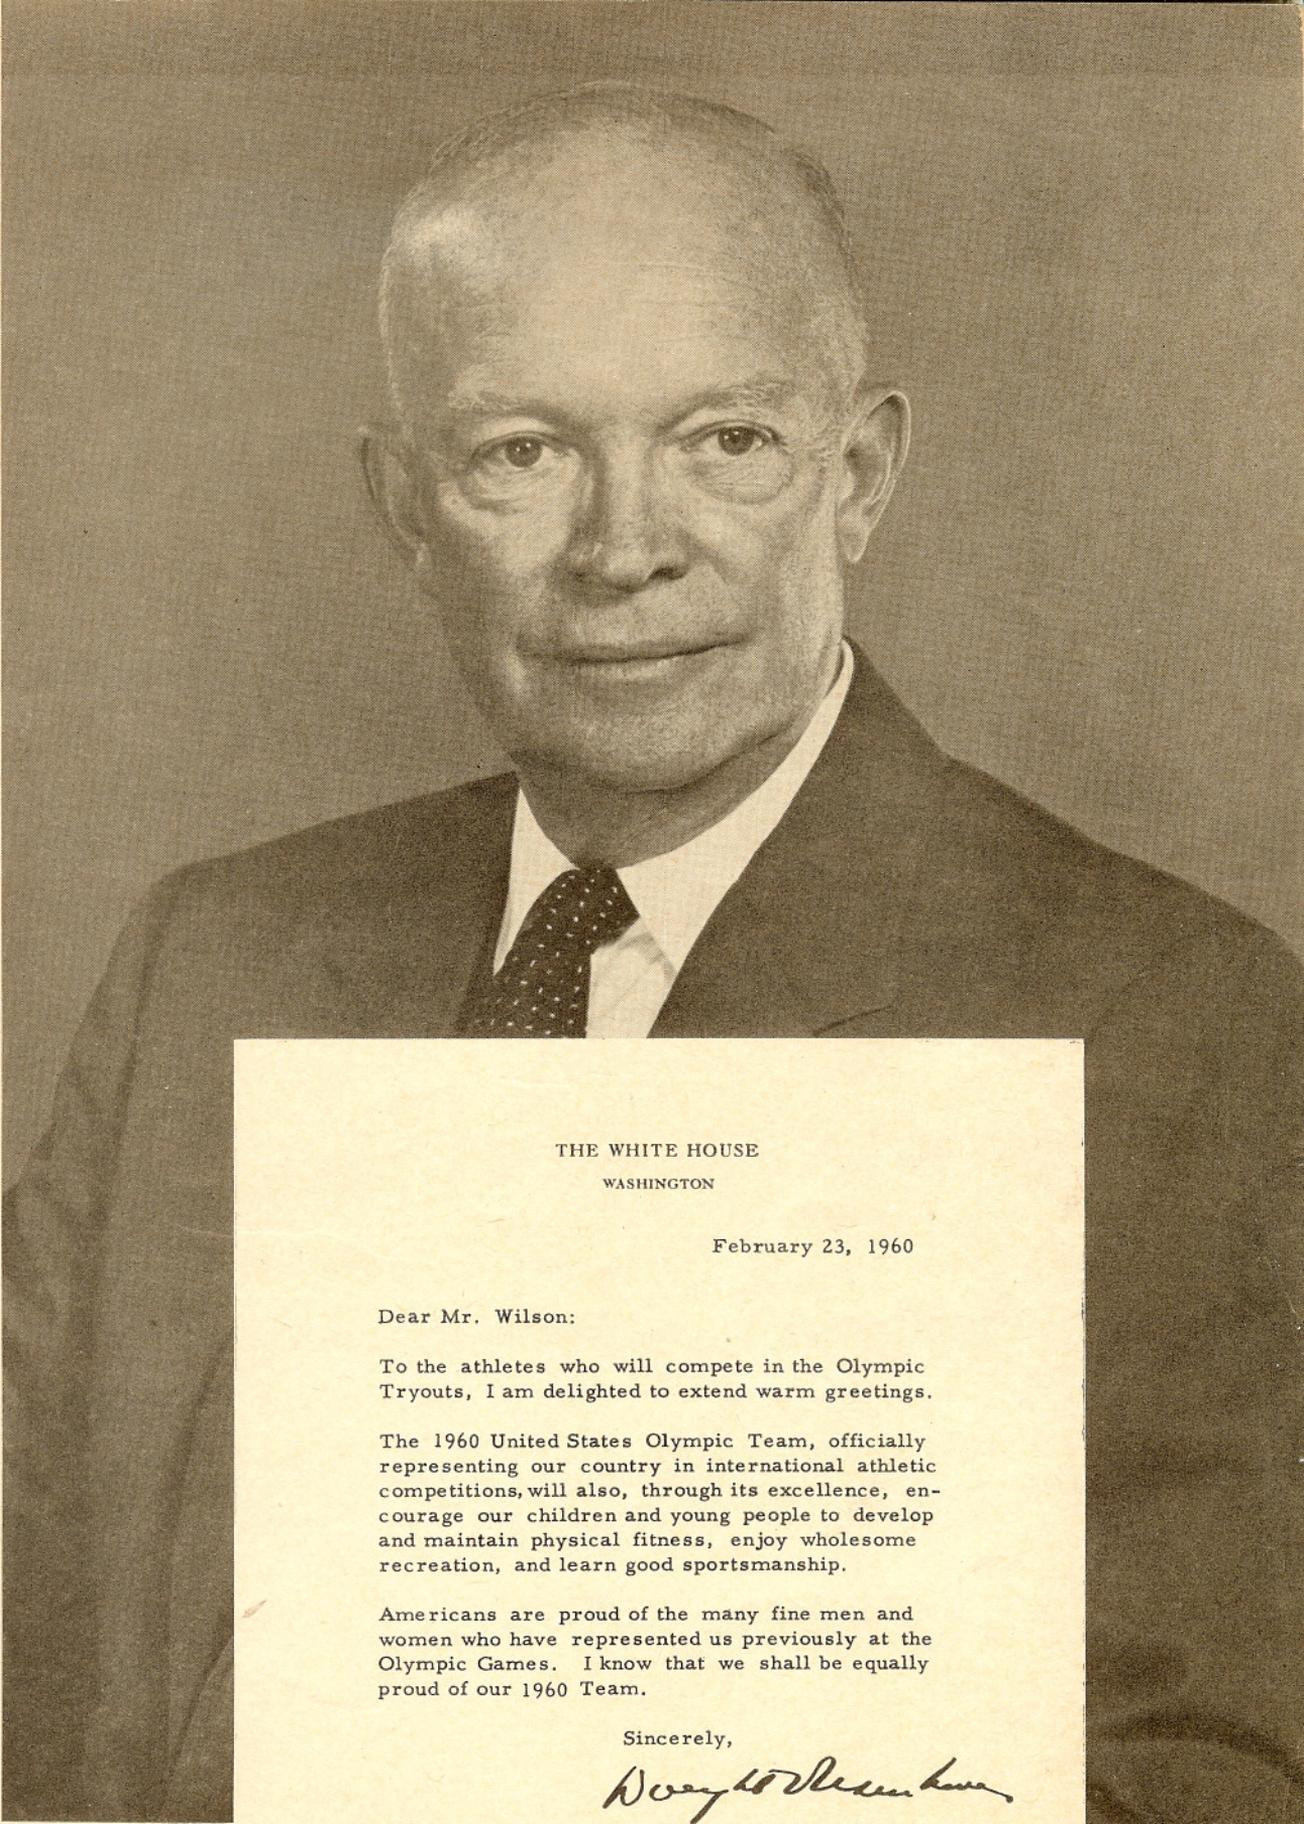

The only sure way to get Buick quality is to buy a Buick—any Turbine Drive Buick '60. This is Buick's all-time best—and yours!

*\*Optional at extra cost.*

†Optional at extra cost on LeSabre, standard on Invicta & Electra.

THE TURBINE DRIVE BUICK '60 . . . **BUICK'S ALL-TIME BEST**

BUICK MOTOR DIVISION, GENERAL MOTORS CORP.

THE WHITE HOUSE  
WASHINGTON

February 23, 1960

Dear Mr. Wilson:

To the athletes who will compete in the Olympic Tryouts, I am delighted to extend warm greetings.

The 1960 United States Olympic Team, officially representing our country in international athletic competitions, will also, through its excellence, encourage our children and young people to develop and maintain physical fitness, enjoy wholesome recreation, and learn good sportsmanship.

Americans are proud of the many fine men and women who have represented us previously at the Olympic Games. I know that we shall be equally proud of our 1960 Team.

Sincerely,

Mr Kenneth L Wilson  
President  
United States Olympic Committee  
Biltmore Hotel  
New York 17, N. Y

## **This tower exists to make the home a more pleasant place**

This is the Johnson's Wax Research Tower. But to consider it a laboratory devoted solely to the development of improved wax products is no longer accurate. Today, the scientists who work here are also concerned with other ways to make life more pleasant around the house. From the Tower recently came Raid insecticides, Glade air freshener, and OFF! insect-repellent . . . products that are revolutionary in their fields. Just two examples from many . . . but they suggest the new scope of Johnson's Wax Research.

**ROME IS READY . . . . .**

◆ Stadio dei Marmi

**I**N selecting a city for the Olympic Games (and many cities bid for this honor), the International Olympic Committee considers highly a city which, in order to stage the Games, will have to remodel existing facilities and build new ones. This is in keeping with one of the aims of the Olympic movement: to encourage the development of physical education facilities in all parts of the world.

The city where Olympic Games will be held is selected well in advance. This is to give the city ample time to remodel or build new stadiums and coliseums for gymnastic, aquatic, equestrian, track and field and other events. In 1955, the International Olympic Committee voted to hold the Games of the XVIIth Olympiad (August 25 through September 11, 1960) in Rome. This decision was greeted with tremendous enthusiasm by the Italian Olympic Committee, the Commune of Rome, the Italian Government and the Italian people.

Preparations immediately got under way in Rome to make the Games of the XVIIth Olympiad an athletic spectacle of a magnitude beyond anything in previous history. So great was the enthusiasm of the Italians for the Games that the construction was completed well ahead of tight building schedules. The Italian Organizing Committee displayed a great deal of imagination in planning the Olympic Games, particularly in the architectural field and in the staging of certain events against those historical backgrounds for which Rome is famous everywhere. It is conservatively estimated that the installations at Rome cost \$70,000,000, and would cost upward of \$200,000,000 to duplicate in the United States.

**OLYMPIC VILLAGE**—The compound containing the various stadiums and training grounds where most of the action will take place is called the *Foro Italico Olympic Center*. It lies in a beautiful district just north of Rome. Convenient to this compound, an Olympic Village has been built to house the athletes. It covers over 50,000 square meters, contains a total of 8,052 rooms divided into 1,502 apartments and can accommodate about 8,000 people comfortably. Two, possibly three, athletes will be housed in each room.

A town in itself, the Village has 12 to 14 dining

halls as well as stores, recreation rooms, postal and telephone facilities, barbers and hairdressing services, tourist offices, an infirmary, a bar and so on. A parchment scroll, with the signatures of the Authorities and of the architects, to record the ceremony of the laying of the first stone, has been inserted into an old Roman column on which are engraved the words: "Villagio Olimpico 1960." This column is in the center of the Olympic Village, whose roads are named after famous Olympic champions and persons who have contributed to the Olympic cause.

After the Olympic Games, the Italian National Institute for the housing of State Employees, under whose auspices the Villagio Olimpico 1960 has been built, will dispose of the buildings in accordance with plans for future development. The apartments will be given to State employees.

**MAIN OLYMPIC STADIUM**—Worthy of the Circus Maximus of ancient Rome, the splendid and beautiful Olympic Stadium offers the ultimate in technical facilities and equipment. It can accommodate a total of 100,000 people and contains ultramodern scoring devices, loudspeakers, press accommodations and radio and TV facilities.

The football or soccer field is 344 feet by 229 feet. Facilities for track and field events include a track which is 400 meters long with a straightaway for the 100 meters flat race and 110 meters hurdles. Double platforms for javelin throwing, the long jump, pole vault and for the hop, step and jump competitions are provided for in the stadium. It also contains 12 groups of dressing rooms which can accommodate up to 1,500 athletes at a time.

**STADIO DEI MARMI**—Crowned by huge statues of athletes, the Stadio dei Marmi somewhat resembles a Greek stadium because of its severe architecture. The stadium accommodates 10,000 spectators on tiered rows or steps chiseled out of huge blocks of "Iunense" marble. These 10 tiers, which run around the stadium, add to its noble character. It is because of the marble tiers that the stadium derived its name: Stadio dei Marmi.

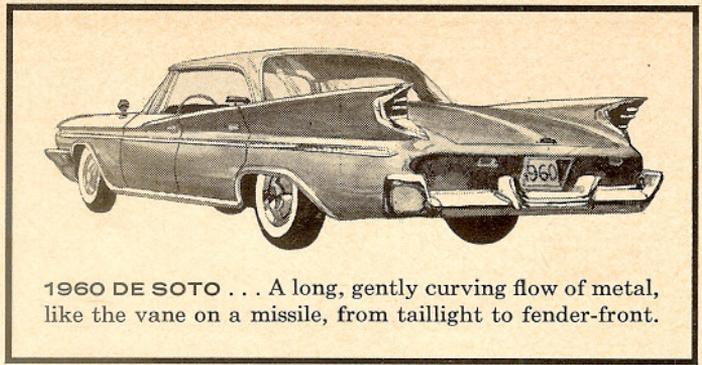

The "marble" stadium contains a green field and an athletics track similar to the Olympic Stadium.

Unmistakable  
any way  
you look at them...

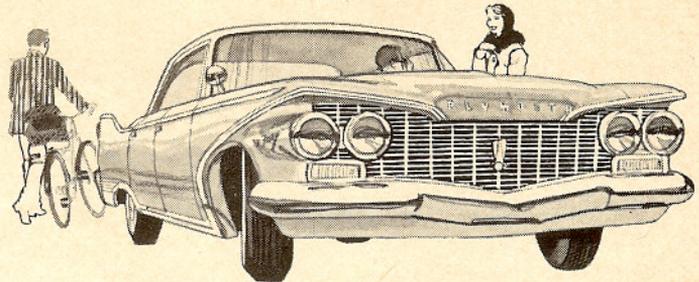

# Pure Automobile by Chrysler Corporation

You'd know these cars at a glance, anywhere you saw them. Their sculptured, thrusting lines are unmistakably Chrysler Corporation.

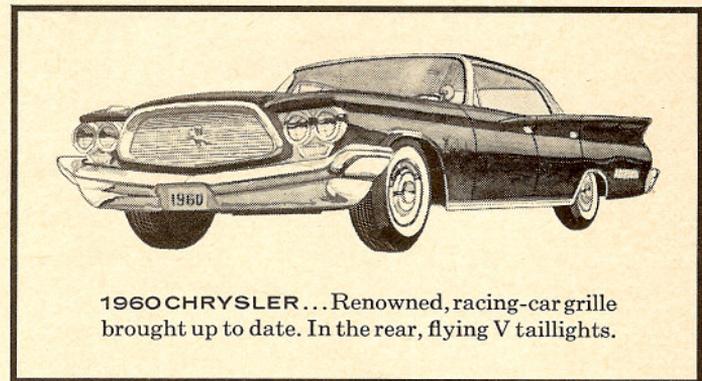

Yet, each one has a distinctive personality all its own. Here are some of the deft touches that set them apart from any other cars on the road...

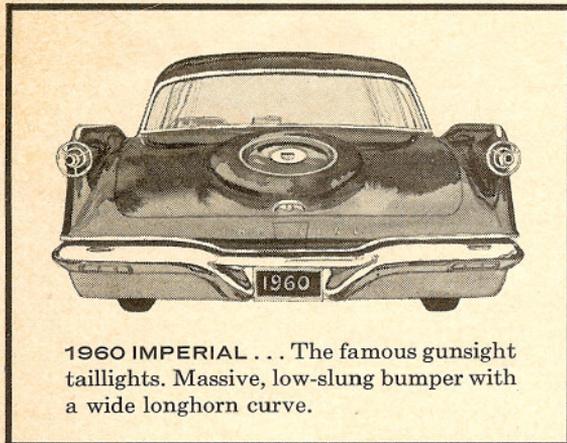

1960 DE SOTO... A long, gently curving flow of metal, like the vane on a missile, from taillight to fender-front.

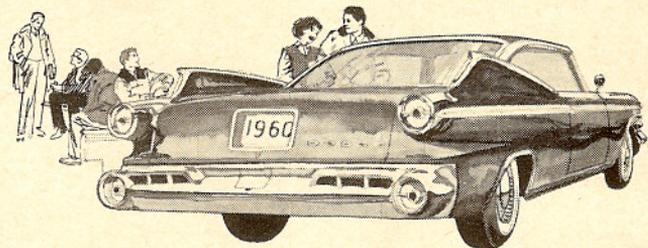

1960 PLYMOUTH... Air-scooped fender insert, outlined by a whiplash arc that sweeps from wheel opening to hood.

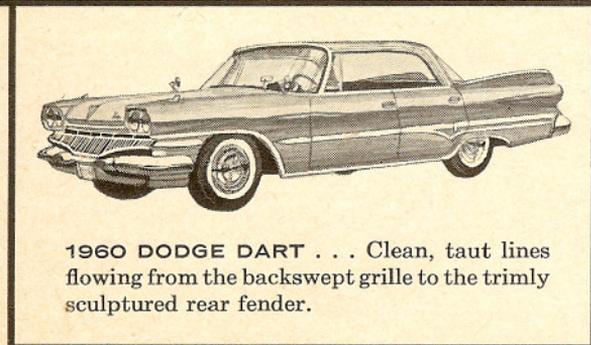

1960 CHRYSLER... Renowned, racing-car grille brought up to date. In the rear, flying V taillights.

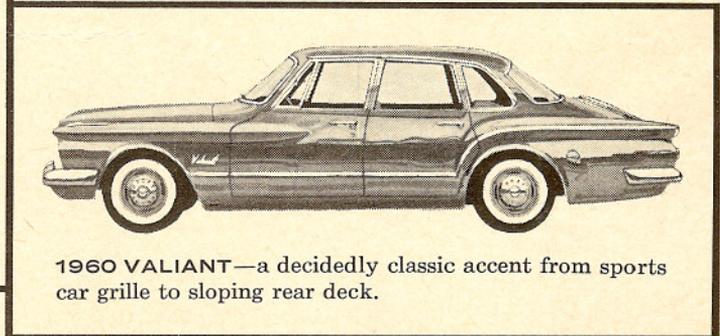

1960 IMPERIAL... The famous gunsight taillights. Massive, low-slung bumper with a wide longhorn curve.

1960 DODGE... Double-barrelled taillight and back-up light sets flank the broad, sleek expanse of the rear deck lid.

1960 DODGE DART... Clean, taut lines flowing from the backswept grille to the trimly sculptured rear fender.

1960 VALIANT—a decidedly classic accent from sports car grille to sloping rear deck.

The Quick, the Strong, and the Quiet from **CHRYSLER CORPORATION**

The track is about 400 meters long and has six regulation lanes. The grass field inside the track will be used for hockey eliminations. The various services, dressing rooms and stores are in two buildings situated on either side of the entrance. At the Stadio dei Marmi, the athletes will be able to warm up before going onto the Olympic Stadium track. An underground subway leads from one stadium to the other.

**FLAMINIO STADIUM**—Ultramodern Flaminio Stadium was constructed specifically for the Games of the XVIIth Olympiad. It stands on the site of the old "Torino Stadium," a once-magnificent example of classic Grecian architecture.

Flaminio Stadium was designed by two world-famous architects, Pier Luigi and Antonio Nervi. Within the limits of available space, these great architects were able to obtain a total capacity which is nearly twice that of the old Torino Stadium. They accomplished this by means of a daring system of projecting tiers. The new stadium has a seating capacity of more than 55,000; 8,000 of the seats are under cover.

Even though this stadium is reserved for football matches, there are numerous training facilities located below the stands which can be reached by separate entrances without interfering with the public. These facilities include an indoor heated swimming pool (25 x 10 meters), a fencing hall, a training gymnasium, two gymnasiums for wrestling and weightlifting and one for boxing.

**PALAZZO DEI CONGRESSI**—The Olympic Fencing Tournament will be held in the enormous Palazzo dei Congressi (Palace of Congresses). This white marble palace is divided into two parts and covers an area of more than 32,000 square meters. The first part consists mainly of a large square recep-

tion hall 40 meters wide and 40 meters high—large enough for the colossal Roman Pantheon of old to fit exactly into it. The second part contains a hall with a seating capacity for 1,000 people, five booths for simultaneous transmission and one for projection. There are also two other halls, each capable of accommodating 500 people, as well as several minor halls. The impressive height of the hall, with a colonnade about 80 meters high, imparts an air of solemnity to the buildings. On the terrace an open-air theater has been built which will hold 1,400 people. From here, it is possible to see the whole Olympic compound, the Tyrrhenian coast and a breathtaking panorama of Rome encircled by the Latium Hills.

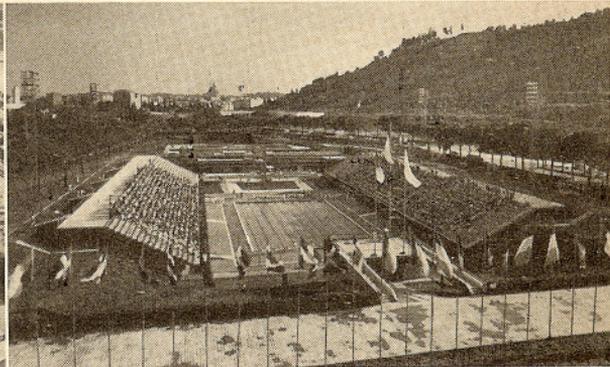

**OTHER FACILITIES**—The Foro Italico Olympic Center is also located near the covered Swimming Stadium, to which it is connected by an underground tunnel. This stadium contains a number of pools of various sizes and depths. Some of the pools not only have galleries around the perimeter, but glass observation panels which enable spectators to follow the underwater movement of swimmers.

The Velodrome is fitted with the most modern technical equipment. The wooden cycling track is 400 meters long. Inside the track is a grass area suitable for hockey and football games. The stands, with a seating capacity of 20,000, are above various offices and broadcast and telecast facilities. An underground passageway, where bicycles may be ridden, will connect the track with a service building containing dressing rooms, a gymnasium, a workshop and stores.

Additional facilities, too numerous to describe in detail, include the Palazzo dello Sport, the Palazzo dello Sport, the equestrian sites and the pentathlon sites.

◆ Flaminio Stadium

◆ Del Nuoto Stadium

**NEW PRECEDENTS SET IN ROME**—In addition to establishing a new high in aesthetic standards, the magnificent preparations at Rome have attracted a record number of participating nations. Until now, the 1952 Olympic Games at Helsinki, Finland, boasted the largest number of participating nations, 69. The 1960 Olympic Games at Rome will shatter this record. Athletes from more than 80 nations will compete. This is at once a tribute to the magnificent preparations at Rome and a strong vote of confidence for the Olympic cause.

## THE OLYMPIAD

— a tradition beyond recorded history

❖ Greek Vase VI Century B.C.  
Courtesy of The Metropolitan Museum of Art

**T**HERE are few institutions created by man with as long a history as that of the Greek Olympiads. Although the earliest recorded Games did not take place until 776 B.C., the sacred valley of Olympia off the western coast of Greece is known to have played "host" to the Games for many centuries prior to this date. It was to Olympia that the ancient Greeks went every four years to pay homage to their great god Zeus. Highlighting the religious ritual was the playing of games for the dead. It was the belief that the spirits of the dead were as delighted by such spectacles as during their earthly life. The earliest of these Greek Games to be recorded took place in 776 B.C.

The idea gradually developed that the gods themselves were present but invisible and delighted in the religious services and athletic contests. It was not until the fourth century B.C. that the Games were held in honor of a living person.

In time, the Olympic Games became the greatest festival of the mighty Greek Empire. Once every four years, trading was suspended, the continuously-warring states and the fighting tribes laid down their arms and all of the people went forth in peace to pay tribute to the manhood of their nation. The Olympic Games became so important that time was measured by the four-year interval between Games. Thus, a four-year period was called an "Olympiad."

For the first 13 Olympiads, the competition consisted of a single race of 200 yards, approximately the length of the Stadium of Olympia (about 643 feet long and 97 feet wide). This race was called the "Stade," from which our word "stadium" was derived. The first recorded victor in 776 B.C. was Coroebus of Elis, a cook. The athletes of Elis maintained an unbroken string of victories until the fourteenth Olympiad, at which time a second race of two lengths of the stadium was added. In the

fifteenth Olympiad, an endurance event was added in which contestants went 12 times around the stadium, about four and one-half kilometers. The athletes competed in groups of four, which were determined by drawing lots. The winners competed against other winners in an elimination contest until a final race was run. These ancient Olympic runners, incidentally, raced on shifting sand to make the competitions as strenuous as possible.

In 708 B.C., the pentathlon and wrestling events were introduced. In the pentathlon, those who jumped a certain distance qualified for the spear throwing, the four best sprinted the length of the stadium, the three best threw the discus, with the two best engaging in a wrestling match to the finish. In 688 B.C., boxing; in 680 B.C., the four-horse chariot race; in 648 B.C., the pancratian (boxing-wrestling games); and in 580 B.C., the "armed race" where the men raced around the stadium twice, heavily armed.

**THE OLYMPIC IDEAL EMERGES**—By the fifth century B.C., the Golden Age of Greece, the Olympic Games reached the peak of their glory. Those were days when culture meant both physical and mental development. Philosophers, dramatists, poets, sculptors and athletes met on a common ground at Olympia. Plato, the great thinker, was also a great athlete and won honors in the Games. His name came from his broad back.

At their peak, the Olympic Games were organized on a highly idealistic, semireligious basis. They were strictly amateur. For many centuries, the only prize was a simple wreath of wild olive; the important thing was the game itself, the honor of winning.

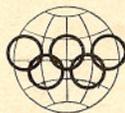

Gradually, however, abuses and excesses developed. Cities tried to demonstrate their superiority over other cities by establishing special training camps to produce winners. Athletes were subsidized,

AVERY BRUNDAGE, President

DOUGLAS F. ROBY

JOHN J. GARLAND

recruited from other communities. Special prizes and awards and all sorts of inducements were offered, even pensions for life to the winners. What was originally fun, recreation, a diversion and a pastime became a business.

During the middle of the second century B.C., Greece came under the domination of the Romans, who permitted the Games but had no interest in them. Over the vigorous protests of the great philosophers and thinkers of that era, a special class of men who did nothing but compete at Olympic Games developed. Wealthy individuals and men with great political power, including the Roman Emperor Nero, conspired to change regulations and "fix" events so that they could win. Centuries passed. The Games continued, but the high Olympic ideals were discarded and profit alone provided the incentive to win. In 393 A.D., the Emperor Theodosius banned the Games entirely.

The ancient Games endured nearly 300 Olympiads, almost 1,200 years. Few institutions created by man have survived so long. Significantly, the rise and fall of the ancient Olympic Games parallels the rise and fall of the ancient Greek Empire. When the Games were at their peak so, too, was the Greek Empire. When the Games became materialistic and were finally abolished, gone too was the glory that once was Greece.

**OLYMPIC TRADITION AT ITS BEST IS REBORN**—Revival of the Olympic Games after 1,503 years was the result of the efforts of Baron Pierre de Coubertin, a French scholar and educator.

In 1880, when Coubertin was only 17, he became concerned with the plight of the French people. They had been weakened by rapid changes in government—three monarchies, two empires and three republics in a single century—and were then trying to recover hope and self-respect after the dev-

astating Franco-Prussian War. Coubertin saw no chance for stability in France unless it concentrated on the improvement of the individual. To this end he devoted his life. Coubertin had ample means to travel. He visited England and America, where he studied organized athletics in the schools. He observed that students competing for a place on an athletic team developed important qualities of character such as self-control, poise, will power, self-confidence, patience and perseverance.

At that time, educators in France and most other countries were of the opinion that athletics had no place in the school curriculum. Coubertin believed otherwise. Though he was not an athlete, from then on he elected athletics as his field. More specifically, he elected the development of international athletic competitions as his life's work, in the belief that an international interest in sports would lead to a recognition of the value of physical culture and education for the youth of the world.

The first major sport Coubertin associated himself with was rowing. But when he tried to bring French and British oarsmen together for competitions he found the British and French definitions of amateurism were not the same. This gave him the idea of bringing together educators, diplomats and sports leaders for the purpose of developing a universal understanding of amateurism so that the athletes of all nations might meet on an equal basis.

Coubertin realized that to capture the attention of disinterested persons he would have to originate something spectacular. Familiar with Greek history, he began to dream of a revival of the ancient Olympic Games. At a meeting of the Athletic Sports Union at the Sorbonne in Paris in 1892, he first publicly announced the Olympic Games idea. Speaking at the conference, Coubertin said: "Let us export oarsmen, runners, fencers; there is the free

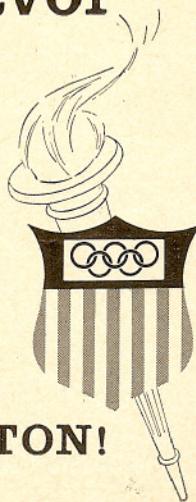

A New First for Summer Thirst!

# Lipton Instant Tea

## At Last! Instant Iced Tea with Fresh-Brewed Flavor

• Never before an instant tea with fresh-brewed flavor! Instantly cooling! Instantly thirst-quenching! New Lipton Instant Tea dissolves instantly in cold tap water. Keeps its fresh-brewed flavor even with twice the ice. Never cloudy, never bitter. Always bright and clear. Costs about 1½ cents per glass. So ice up! Drink up! Get New Lipton Instant Tea today!

**It tastes so good you know it's LIPTON!**

A precise blend of choice teas flavor-protected with equal parts of Malto-Dextrin.

trade of the future—and on the day when it shall take its place among the customs of Europe the cause of peace will have received a new and powerful support." However, his listeners did not fully grasp the significance of his proposal and nothing came of it.

His next opportunity to revive the Olympic Games came in the spring of 1894 at an international congress in Paris which he assembled for the purpose of studying the questions of amateurism. At this meeting, seven questions were on the agenda. Coubertin took the liberty of adding an eighth: "Regarding the possibility of the revival of the Olympic Games." Coubertin imparted his enthusiasm so well that it was unanimously agreed on June 23, 1894 to revive the Games and form an International Committee to watch over their development and well-being.

Two years later, in 1896, Coubertin succeeded in launching the first modern Olympiad at Athens, Greece.

The work of Coubertin was, above all, a work of peace. But there is one basic fact, almost universally misunderstood: Peace is *not* the major aim of the Olympic Games. "Peace," Coubertin hoped and believed, "would be furthered by the Olympic Games . . . but peace could be the product only of a better world; a better world could be brought about only by better individuals; and better individuals could be developed only by the give and take, the buffeting and battering, the stress and strain of fierce competition."

**THE MODERN OLYMPIC MOVEMENT IN ACTION—**  
The modern Olympic movement is many things. It is a plucky Czech distance runner collapsing at the finish line and being helped up and given first aid by a Norwegian, an American and a Korean. It is a tiny Japanese, outclassed in the 10,000 meters, moving to the outside of the track so that a Pole and a Finn might have a chance to break the Olympic record. It is the universal desire to *play fair* in the most hotly competitive of contests by men of every ideology and of every race.

A new tradition has developed since the revival of the modern Olympic Games. It is a tradition of the strictest adherence to the principles of pure amateurism: "An amateur is one who competes solely for pleasure . . . without material gain of any kind, direct or indirect."

At the Vth Olympiad in Stockholm, Sweden, in 1912, Jim Thorpe won both the decathlon and pentathlon. He was dubbed "the greatest athlete in the world" by the King of Sweden and returned to the United States a hero. Then Thorpe was found to have played professional baseball earlier in his career, violating Amateur Athletic Union rules. His victories were expunged from the books, his trophies given to those who placed second to him. Dozens of campaigns were launched to get back his medals. Glenn S. Warner, who coached Jim Thorpe in 1912, said: "He made an innocent mistake, but innocence has never been part of the definition of an Olympic amateur. What's fair for one is fair for all.

In 1932 at Los Angeles (Xth Olympiad), evidence

was presented that Paavo Nurmi, Finland's idol and a six-time Olympic winner, had been paid for racing. This proof of violation of the amateur rule came like a bombshell on the eve of the Games. With more than 100,000 fans waiting to see the fabulous Nurmi run, it would not have been difficult to temperize, postpone action or compromise. But Nurmi was dropped from the Games as if he had been totally unknown.

Barbara Ann Scott, prior to the 1948 Winter Games, had won the world figure-skating title, representing Canada. Admirers presented her with an automobile. She was told: "Return the car or be ruled out of the Olympic Games as a professional." This timely warning allowed Miss Scott to return the car, retain her amateur standing and go on to win in Switzerland.

Domestically, the United States has so many candidates for the Olympics that the only fair approach is a series of exhausting qualifying tests. Only three men can be named in each event, and many a potential Olympic victor was eliminated because of a bad break in the trials.

In 1936, pole-vaulter George Varoff broke a world record a few days before the trial, but failed to qualify. Shot-putter Chuck Fonville and miler Gil Dodds, two of the best, lost out by last-minute bad breaks in 1948. There was a lump in every official's throat in 1948 when Harrison (Bones) Dillard, who held the world's record for the high hurdles, suffered a startling defeat in the trials. But Dillard was a fighting athlete—the test of an Olympic competitor. He took his misfortune in stride and, entering the 100-meter dash, where he had little experience, won a team position. At London, he sped to the Olympic 100-meter championship in one of the biggest upsets of all time.

The result of this strict adherence to the high ideals and noble aspirations of the Olympic movement has been a growing surge of Olympic interest wherever one goes in the world. There are committees in such places as Afghanistan, Burma, Korea and Paraguay. In La Paz, Bolivia, workmen hauled tons of material almost straight up the Andes to build the world's highest athletic plant. In Pakistan, crowds of 30,000 turn out to cheer Olympic contenders. Guatemala, with less population than the city of Chicago, has spent over \$12,000,000 on a sports center. Mexico City has an athletic plant of amazing size. Rio de Janeiro has a stadium holding 210,000 spectators.

In the final analysis, the modern Olympic movement is a powerful and growing force for peace. It brings together all the nations of the world under one five-ringed flag. When the Games begin, international barriers fall. The honors and awards do not go to one or another nation. Men of all nations pay homage to the winners, regardless of their race, color or creed. True, there is a reflected glory on the countries from whence good winners and good losers come. But, at the Olympics, the individual reigns supreme. And, as Baron Pierre de Coubertin said, a better world can only be brought about by better individuals.

## FINAL TRYOUT PROGRAM FOR 1960 U. S. OLYMPIC TEAM

Official tryouts for the team that will represent the United States at the XVIIIth Olympiad to be held in Rome, Italy (Aug. 25-Sept. 11, 1960) will continue into the first weeks of August. Winners of the U. S. Olympic tryouts will begin chartered flights to Rome on August 13th.

United States athletes will compete in all Olympic Games except field hockey and soccer football. Here, in capsule form, is the program for final tryouts as it stands at press time.

### **Athletics (Track & Field)—Men**

July 1-2, Stanford University, Palo Alto, California.

### **Athletics (Track & Field)—Women**

July 16, Abilene Christian College, Abilene, Texas.

### **Basketball—Men**

March 31-April 2, Denver, Colorado.

### **Boxing**

May 18-20, Cow Palace, San Francisco, California.

### **Canoeing**

July 16-17, Lake Sebago, New York.

### **Cycling**

July 23-28, New York City.

### **Equestrian—Men and Women**

Three-Day trials for training squad at Pebble Beach, Calif., June 18-26. Dressage trials at Scarborough-on-Hudson, N. Y., May 16. Jumping team already selected.

### **Fencing—Men and Women**

July 3-9, Hotel Commodore, New York City.

### **Gymnastics—Men and Women**

April 29, 30-May 1, U. S. Military Academy, West Point, New York. (National AAU championships)

### **Modern Pentathlon**

July 20-24, Fort Sam Houston, Texas.

### **Rowing**

July 7-9, Lake Onondaga, Syracuse, New York.

### **Shooting**

July 18-August 4, Fort Benning, Georgia.

### **Swimming—Men and Women**

August 2-5, Brennan Pools, Detroit, Michigan.

### **Water Polo**

July 1-4, Olympic Pool, Los Angeles, California.

### **Weightlifting**

June 11-12 at National AAU Championships, Cleveland, Ohio.

### **Wrestling**

April 28-30 (Free Style); May 2-3 (Greco-Roman), Iowa State U., Ames, Iowa.

### **Yachting**

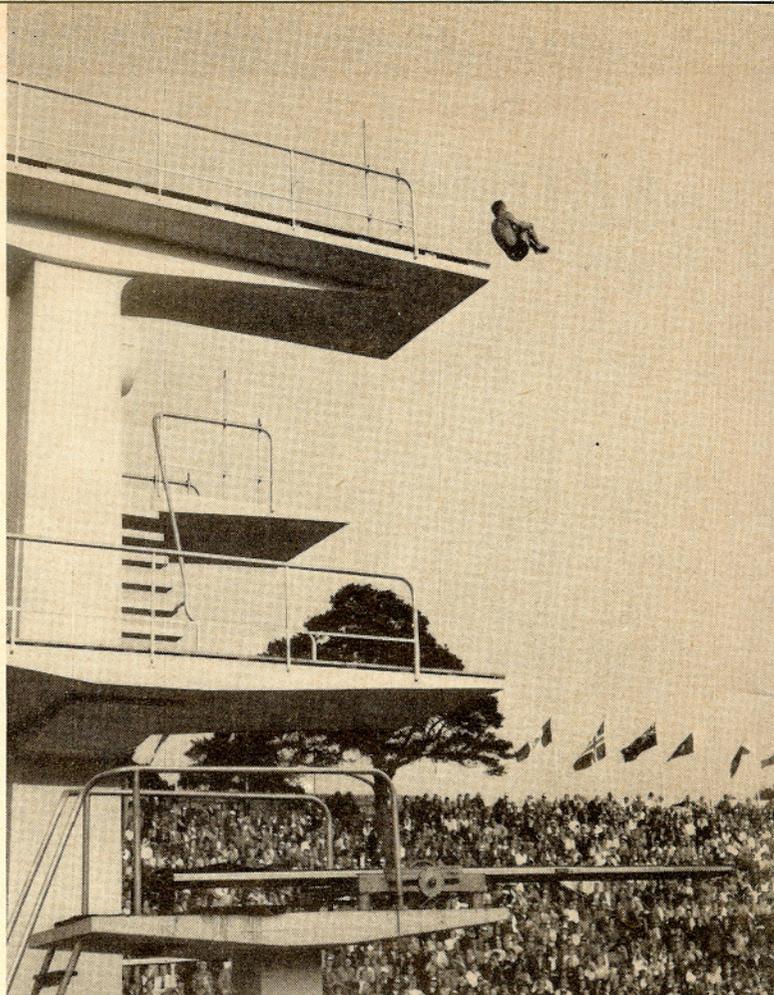

May 30, Flying Dutchman class, Clearwater, Florida.

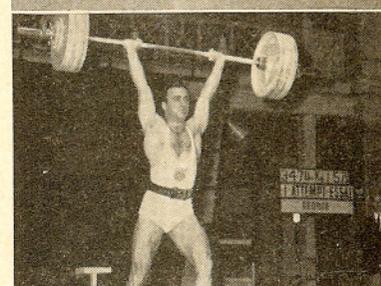

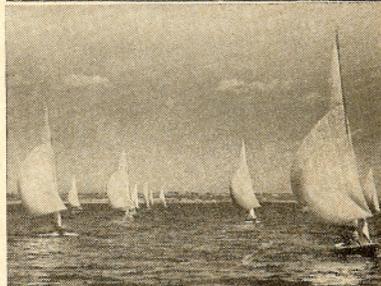

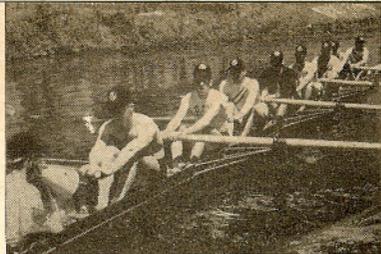

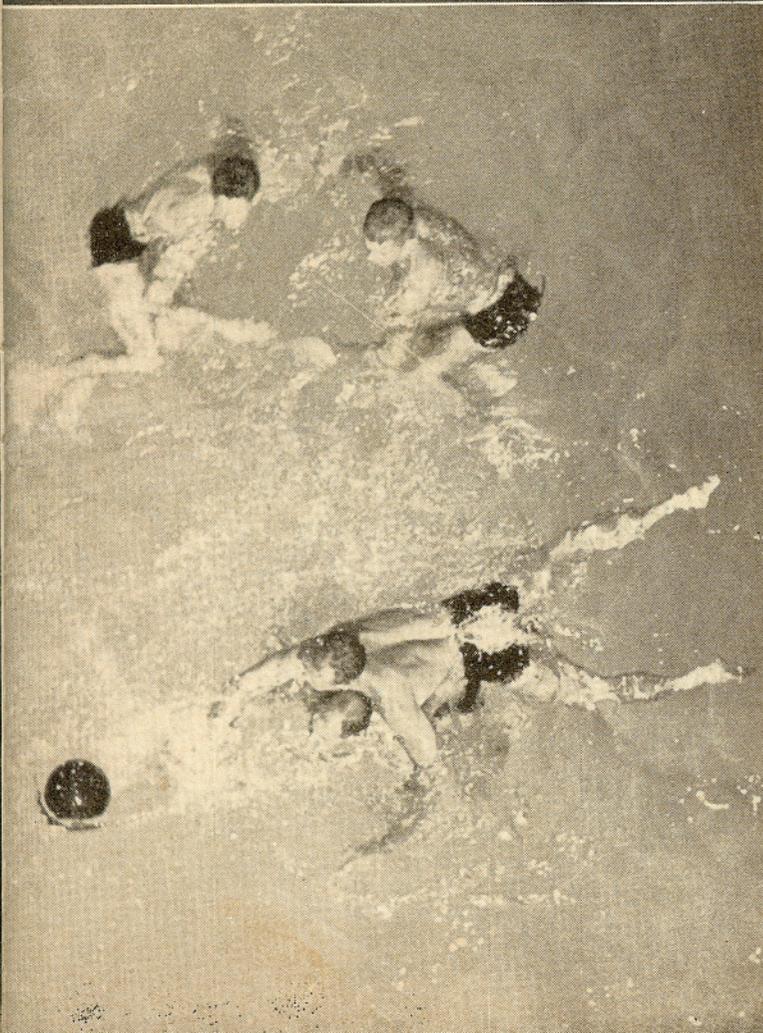

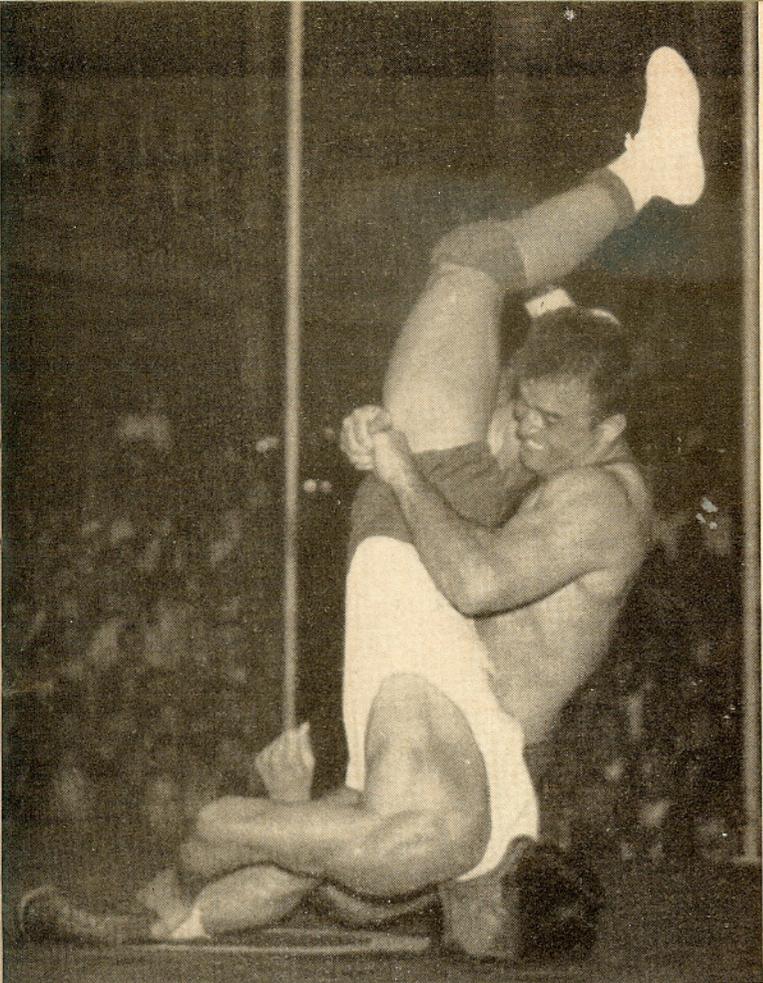

June 10, Dragon classes, New Orleans, Louisiana.

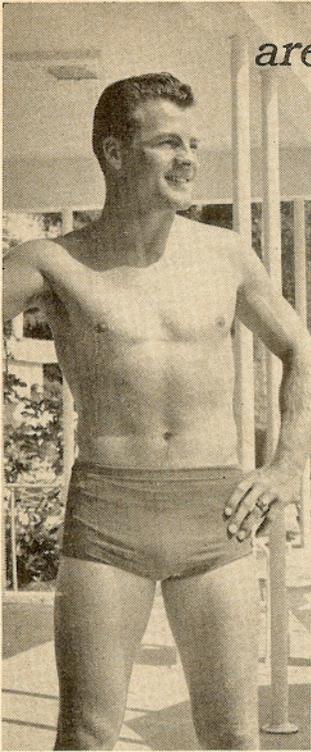

June 19, 5.5 Meter class, Marblehead, Massachusetts.

July 11, Finn Monotypes, Marblehead, Massachusetts.

July 20, Star Class, Atlantic Highlands, New Jersey.

Charter member of the Jantzen International Sports Club wearing official Jantzen tank suit.

are attractive lady swimmers, because they wear the tank suit worn by Olympic Swimmers, eligible for the Jantzen International Sports Club?

We of the Jantzen International Sports Club are probably the only organized resistance against the forces of togetherness\*, and, although we admire women and their works intensely, we have to make a few things clear, or at least muddy them up in our favor.

We believe that the "Medalist" racing suit is the world's most pleasing *undiscovered* water garment; else why do maidens of comely structure wear nothing else so frequently? It fits, as they say, like a suntan; lovely girls are the lovelier for it; and good swimmers actively engaged in aquatic training already know that it has been worn by the Olympic swimmers. Those in the know — including you, of course, now — refer to it as the famous Jantzen tank suit.

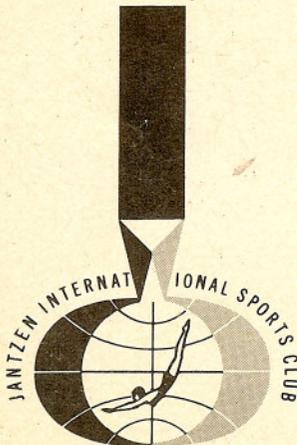

The women's suit (study the photograph below, please) is of beautiful nylon, and weighs three and three-eighths ounces. The men's suit weighs one-half of the women's suit, or one and eleven-sixteenths ounces. Both are double-stitched, and they dry almost as soon as the race is over, provided the swimmer leaves the pool.

Does the Jantzen racing suit actually make the Olympic swimmers swim faster? Many think so; all of us hope so.

"Medalist" tank suits come in red, green, royal, navy and black. These prices prevail: Men's, \$3.95. Women's, \$7.95. Girls', \$5.98 and \$6.98, depending on amount of fabric. Boys', \$3.50. Write in for an order blank; the address is Jantzen International Sports Club, Jantzen Inc., Portland 8, Oregon.

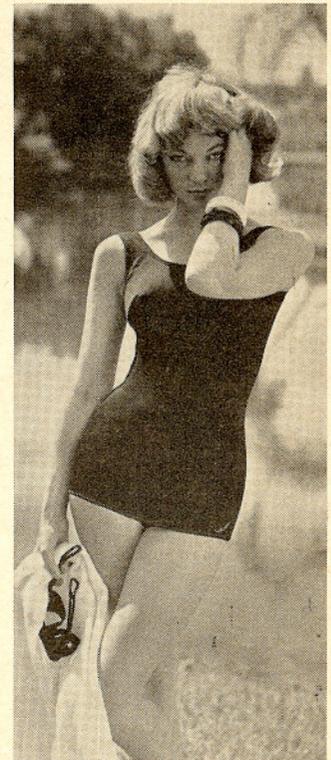

Regarding women joining the Jantzen International Sports Club: See the membership rules committee chairman, Mr. Gifford.

\*"Togetherness" is the external philosophy of McCall's, a kind of Popular Mechanics for women.

*Jantzen*

# **UNITED STATES 1960 MEN'S FINAL OLYMPIC TRACK AND FIELD TRIALS**

STANFORD STADIUM

Hosted by

**STANFORD UNIVERSITY  
STANFORD, CALIFORNIA**

**JULY 1-2, 1960**

This program published by the Stanford University Athletic Department  
Under the supervision of Don E. Liebendorfer  
Dick Barnes, Program Editor

## SCHEDULE OF EVENTS

### Friday, July 1

Time	No.	Event	Page No.	Time	No.	Event	Page No.
2:30	1	Hammer Throw Final . . . . .	23	6:25	7	100 Meter Dash, 2 Heats . . . . .	29
		(Angell Field)		6:40	8	800 Meter Run, 2 Heats . . . . .	30
5:30	2	High Jump Final . . . . .	24	6:55	9	5000 Meter Run Final . . . . .	31
5:30	3	Javelin Final . . . . .	25	7:15	7	100 Meter Dash Final . . . . .	29
5:30	4	Shot Put Final . . . . .	26	7:20		Hammer Throw Exhibition . . . . .	23
5:30	5	Broad Jump Final . . . . .	27	7:30	6	400 Meter Hurdles Final . . . . .	28
6:00	6	400 Meter Hurdles, 2 Heats . . . . .	28				

### Saturday, July 2

Time	No.	Event	Page No.	Time	No.	Event	Page No.
1:00	10	Pole Vault Final . . . . .	34	2:45	16	3000 Meter Steeplechase Final . . . . .	40
1:45	11	110 Meter Hurdles, 2 Heats . . . . .	35	3:00	11	110 Meter Hurdles Final . . . . .	35
2:00	12	Hop-Step-Jump Final . . . . .	36	3:15	15	200 Meter Dash Final . . . . .	39
2:00	13	Discus Throw Final . . . . .	37	3:30	17	1500 Meter Run Final . . . . .	41
2:00	8	800 Meter Run Final . . . . .	30	3:40	14	400 Meter Dash Final . . . . .	38
2:10	14	400 Meter Dash, 2 Heats . . . . .	38	3:50		Closing Ceremonies	
2:25	15	200 Meter Dash, 2 Heats . . . . .	39				

## USE OF THIS PROGRAM

This program has been designed to provide, within reason, as much information as possible about both the events and competing athletes. It will be noted that full information on each event is confined to one page. Though this will necessitate flipping backward through the pages to some events, it is felt that this is superior to placing heats on one page and finals on another, thus forcing continual switching between pages to note spellings, best marks, and so forth. Recording blanks to the right of each competitor's name have been provided in place of the normal lines below the event to lessen the amount of writing the fan must do to fully record results. Attention is called to the roster of competitors, where track athletes and field event men are placed in separate alphabetical listings.

The following abbreviations are used to conserve space:

NCAA—indicates athlete qualified for trials by placing among top six Americans at National Collegiate championship meet. Number preceding NCAA is his finish in that meet, figure following is his mark in that meet.

AAU—athlete qualified from national AAU championships by placing among top six Americans not previously qualified.

IS—athlete qualified from national service championships by winning or being designated a worthy second- or third-place finisher.

y—time is for race run at yards rather than meters.

t—time is for race run on turn rather than straight-away.

n—nonwinning time.

w—wind-aided time.

## NEW STANDARDS TOUGHEN ROAD TO ROME OLYMPICS

A new set of qualifying rules that stiffens Olympic competition but complicates United States team selection has gone into effect for the first time this year.

In previous Olympics, each country could send as many as three men per event, regardless of their skill. But this made for such unwieldy fields that qualifying marks have been established. Now, each country can send one man per event regardless of his best mark. But if it desires to send two or three men, they ALL must have equalled or bettered the qualifying standard sometime between last October and August 15.

In most events, this poses no problem for the United States, where many men have topped the standard. But in some cases, particularly the long distances, hammer throw and hop-step-jump, Uncle Sam is short on men who can qualify.

The problem is complicated by U.S. qualifying rules, which state that a man must place among the first three at the final trials to go to the Olympics. The difficulty will come if a man who has not bettered the standard places in the first three, while one who has bettered the standard finishes out of the top three at the trials.

U.S. officials say such problems will be dealt with as they arise. But they add that a man who places in the first three and has not bettered the standard will be given every opportunity to eclipse it before the August deadline. Should he still not qualify, it is likely that the next-best performer at the final trials who has bettered the qualifying mark will be placed on the U.S. team.

The qualifying standards:

100 meters, 10.4 (9.5y)  
200 meters, 21.3 (21.4y)  
400 meters, 47.3 (47.6y)  
800 meters, 1:49.2 (1:49.8y)  
1500 meters, 3:45.0 (4:02.0, mile)  
5000 meters, 14:10.0 (13:45.0, 3 miles)  
10,000 meters, 29:40.0 (28:50.0, 6 miles)  
3000 meter steeplechase, 8:55.0  
110 meter high hurdles, 14.4 (14.4y)  
400 meter intermediate hurdles, 52.2 (52.5y)  
High Jump, 6-8 $\frac{3}{4}$   
Broad Jump, 24-7 $\frac{1}{4}$   
Hop-Step-Jump, 51-2  
Pole Vault, 14-5 $\frac{1}{4}$   
Shot Put, 55-9 $\frac{1}{4}$   
Discus Throw, 173-9 $\frac{1}{2}$   
Javelin Throw, 251-0  
Hammer Throw, 203-5  
Decathlon, 6750

## LONGINES CINE-TIMER TO CHECK ALL FINISHES

Vital inches that might decide who'll represent the United States in the Olympics will be seen by more than just judges' eyes in the final trials.

The Longines Cine-Timer, a photo-camera device that takes pictures at the rate of 100 per second, has been donated for use at the trials to make sure no man is left off the team due to the frailties of the human eye.

Three Cine-Timers were used at the Pan American Games in Chicago last summer, where they revealed a six-inch win in a rowing event, a perfect dead heat in a cycling race, and settled several disputed decisions in track events.

A time recorder, the type used in national observatories to keep standard time, measures the exact time of each frame shot by the camera to provide place times as well as finishes. The recorder is connected electrically to the starter's pistol.

A new process, to be used here for the first time, completely develops and dries film at a rate of 15 feet per minute. Finished enlargement prints will be available to judges less than two minutes after each race.

## JOHN RAITT, MARINE BAND FEATURES OF CEREMONIES

Colorful opening and closing ceremonies featuring stage, screen and television star John Raitt and the First United States Marine Division Band will be held on both days of the Olympic Trials.

Raitt, especially noted for his performance in "Pajama Game," will sing the National Anthem as the highlight of opening ceremonies each day. Raitt is no stranger to a track meet—he was once California State High School shot put champion while competing for Fullerton Union High School.

The Marine Band will play national and school songs at various points throughout the two-day meet. Color guard will be furnished by the Redwood City Marine Corps Recruiting Service.

At the close of competition Saturday, the newly chosen United States Olympic Track and Field Team will assemble on the Olympic Rings at the center of the field while the entire crowd, led by John Raitt, sings "God Bless America."

# COACHES, ITINERARY

The United States men's Olympic track and field team, after its selection here, will go under the tutelage of veteran Ohio State spike mentor Larry Snyder. Twice a member of the U.S. Olympic coaching staff, Snyder has been with the Buckeyes since 1925, when he joined as assistant track coach immediately after his graduation.

Snyder, 64, was an outstanding hurdler and jumper in his undergraduate days at Ohio State, setting University records in the highs, lows, high jump and broad jump. He twice captained the Buckeye team, and won the Big Ten scholarship medal for combined excellence in scholastic achievement and athletics.

After serving as assistant to the late Dr. Frank Castleman for seven years, Snyder took over as head coach. He remained there for ten years, until 1942, when he began World War II service in the Navy. He had flown for the Army in World War I. He returned to Ohio State in 1945.

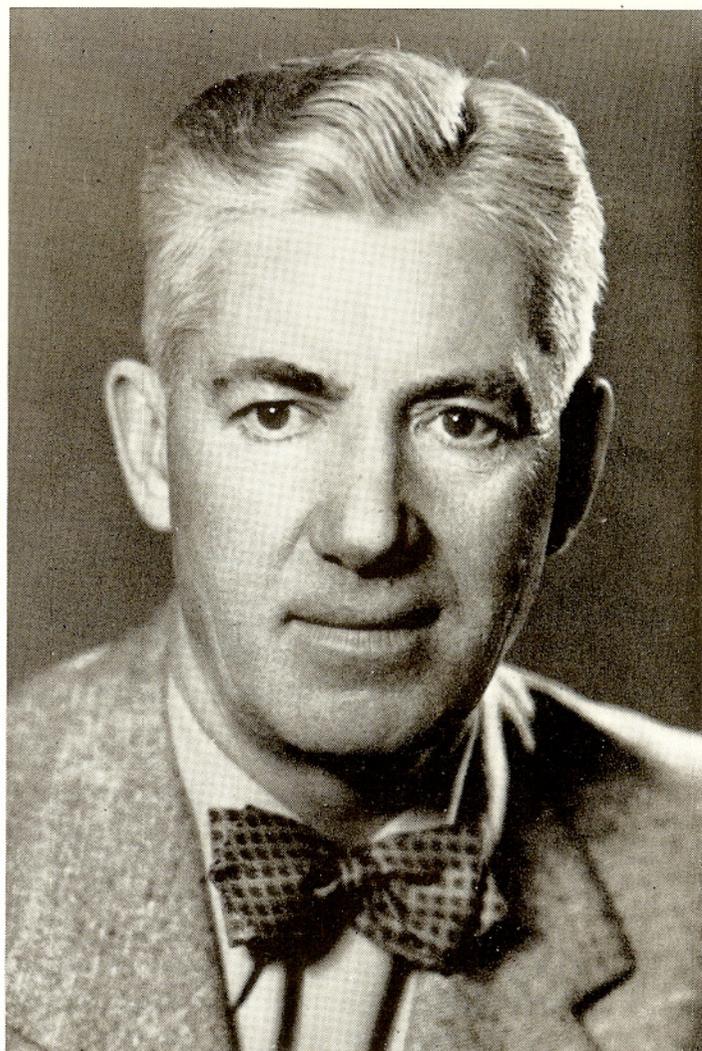

Snyder has enjoyed more than his share of success from both the team and individual standpoint. His Ohio State teams have won six Big Ten titles, and he has coached eight men to world record performances.

Best known of his champions are Jesse Owens, Mal Whitfield and Glenn Davis. Owens set three world marks and tied a fourth in one Big Ten title meet, and captured four gold medals at the Berlin Olympics in 1936. Whitfield won Olympic 800 meter crowns in 1948 and 1952, and Davis won an Olympic title and set a world record in the intermediate hurdles. He also holds the world 440 mark.

Snyder's assistants include Ralph Higgins of Oklahoma A&M, George Eastment of Manhattan and Bud Winters of San Jose State.

Higgins is currently vice-chairman of the National AAU Track and Field Committee, and was also assistant coach on the 1956 team.

Eastment was assistant coach the past two years for the U.S. teams which met the U.S.S.R. in dual meet competition. He coached 1952 Olympic 100 meter titlist Lindy Remigino.

LARRY SNYDER

Winters has brought San Jose to a spot alongside the major track powers of the nation. His sprinters have been especially strong, with Ray Norton his prize product. Winters coached a U.S. team in Scandinavia last summer.

The U.S. team chosen at these trials, plus men picked for the walks, marathon, decathlon and 10,000 meters, will report to the coaching staff at Eugene, Oregon, July 25. After a week of rigorous workouts at the University of Oregon and a squad meet July 30, the team will move to Cal Poly at Pomona. Two additional squad meets will be held in the Los Angeles area during the first two weeks of August.

August 12 or 13, the team will assemble in New York prior to its August 18 departure for Europe.

## PAN AMERICAN GAMES

**T**HE first of the Pan American Games was celebrated in Buenos Aires in 1951. But the idea for these Games had been entertained long before by many nations in both North and South America.

When it became apparent that the Games of the XIIIth Olympiad could not be held at Tokyo in 1940, latent interest in Pan American Games was rekindled. This idea was further stimulated by the war in Europe, which bred a strong spirit of solidarity among the nations of the Americas.

Proponents of the Pan American Games wanted to build new and closer bonds between their nations. Also, they believed such an international competition, to be held between Olympiads, would act as a fillip to amateur athletics in the Americas.

After much correspondence and many discussions, the Argentine Olympic Committee took the initiative. In 1940, it called a Congress of all the countries of the Western Hemisphere to vote for or against Pan American Games. Held in Buenos Aires, representatives of the National Olympic Committees of 16 of the 21 countries in the Pan American Union attended.

This sporting Congress voted to hold Pan American Games once every four years, between Olympic Games, beginning in 1942. World War II, however, made it impossible to conduct the Games at that time. A new date was tentatively set for 1946. This, too, was discarded. Some consideration was given to a 1950 date, only to be dropped to avoid interference with other established competitions.

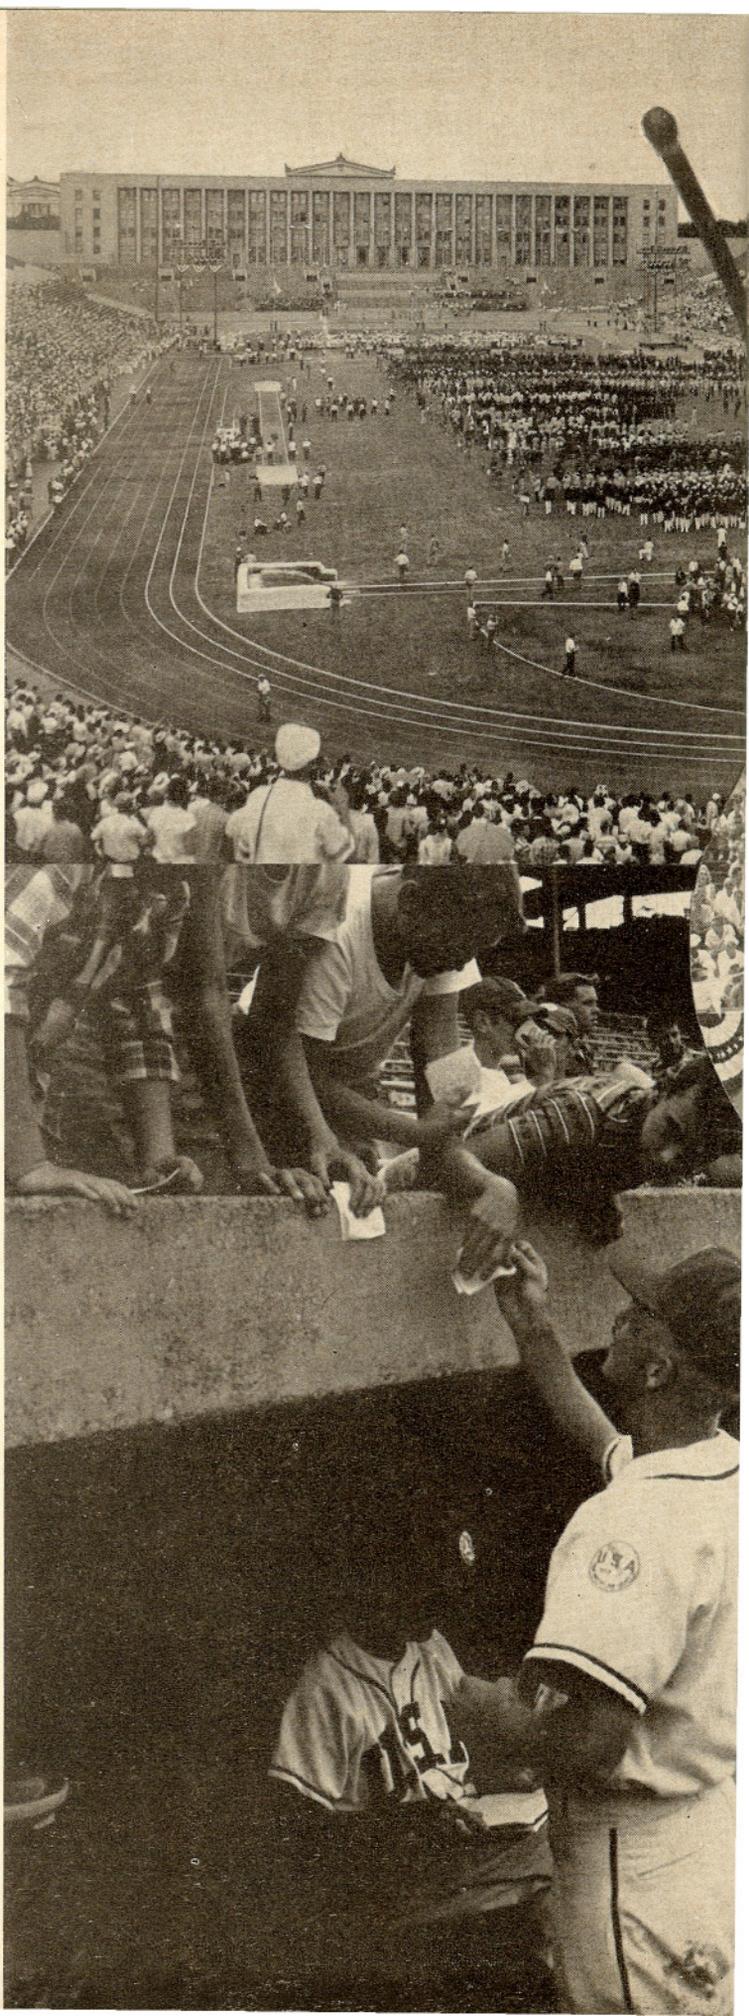

During the Olympic Games at London in 1948, the second Pan American Congress was held. Here, definite plans were laid to hold the first Pan American Games in Buenos Aires in 1951. The Argentine Olympic Committee was entrusted with the organization of the games.

After careful study of the facilities available at Buenos Aires, a program was designed for competition in track and field (athletics), baseball, basketball, boxing, cycling, equestrian sports, fencing, gymnastics, modern pentathlon, polo, rowing, shooting, soccer football, swimming and diving, tennis, water polo, weightlifting, wrestling and yachting.

On February 25, 1951, Delfo Cabrero, Argentina's 1948 Olympic marathon winner, entered the vast stadium of the River Plate Athletic Club, Buenos Aires, carrying his country's blue and white flag. This marked the opening of the 1st Pan American Games.

The 2nd Pan American Games were held at Mexico City, Mexico. The program sponsored 19 sports, but volleyball and synchronized swimming replaced polo and yachting. A total of 21 nations participated.

At the 3rd Pan American Games in 1959 at Chicago, the United States demonstrated an overwhelming superiority. United States athletes competed with representatives of 23 other nations. United States athletes were overshadowed in only five of the 25 events: baseball, tennis, women's volleyball, soccer football and cycling.

# ◆ U. S. CHAMPIONS — PAN AMERICAN GAMES

\* Asterisk denotes Pan American record.

## UNITED STATES TEAM CHAMPIONS PAN AMERICAN GAMES—1951, 1955, 1959

Basketball—Men ..... 1951, 1955, 1959

..... (2,328B) 1955

Skeet Shooting ..... (2,266) 1959  
Volleyball—Men ..... (779) 1959  
Water Polo ..... 1955, 1959  
Synchronized Swimming ..... (654.6) 1955

## MEN'S TRACK AND FIELD

### 100 METER DASH

Year	Champion	Time
1955	J. Rodney Richard	10.3*
1959	O. Ray Norton	10.3*

### 200 METER DASH

1955	J. Rodney Richard	20.7
1959	O. Ray Norton	20.6*

### 400 METER DASH

1951	Mal Whitfield	48.8
1955	Louis Jones	45.4*

### 800 METER RUN

1951	Mal Whitfield	1:53.2
1955	Arnold Sowell	1:49.7
1959	Thomas Murphy	1:49.4*

### 1,500 METER RUN

1951	Browning Ross	4:00.4
1959	Dyrol Burleson	3:49.1

### 5,000 METER RUN

1959	William Dellinger	14:28.4*
------	-------------------	----------

### 10,000 METER RUN

1951	Charles C. Stone	31:08.6
------	------------------	---------

### MARATHON RUN

1959	John J. Kelley	2:27:54.2*
------	----------------	------------

### 110 METER HURDLES

1951	Richard Attlesey	140*
1955	Jack Davis	14.3
1959	Hayes Jones	13.6-x

X—Record not allowed because of following wind.

### 400 METER HURDLES

1955	Josh Culbreath	51.5
1959	Josh Culbreath	51.2*

### 3,000 METER STEEPLECHASE

1951	Charles C. Stone	9:32.0
1959	Philip Coleman	8:56.4*

### 400 METER RELAY

1951	Donald Campbell, Richard Attlesey, John Voight, Arthur Bragg	41.0
1955	Willie Williams, John D. Bennett, Charles Thomas, J. Rodney Richard	40.7
1959	Hayes Jones, Robert Poynter, William Woodhouse, Ray Norton	40.4*

### 1,600 METER RELAY

1951	Hugo Maiocco, William Brown, John Voight, Mal Whitfield	3:09.9
1955	Jesse Mashburn, Lonnie Spurrier, James Lea, Louis Jones	3:07.2
1951	Henry Laskau	50:26.8*

# Events not held in 1955 and 1959.

### HIGH JUMP

Year	Champion	Height
1951	Virgil D. Severn	6'4 3/4"
1955	Ernie Shelton	6'7 1/8"
1959	Charles Dumas	6'10 1/2"

### POLE VAULT

1951	Robert Richards	14'9 1/4"
1955	Robert Richards	14'9 1/4"
1959	Donald Bragg	15'2 1/2"

### BROAD JUMP

Year	Champion	Distance
1951	Gaylord D. Bryan	23'7"
1955	Roselyn Rance	26'4 1/2"
1959	Irvin Roberson	26'2"

### SHOT PUT

1951	James E. Fuchs	56'7 1/8"
1955	Parry O'Brien	57'8 1/2"
1959	Parry O'Brien	62'5 1/2"

### DISCUS THROW

1951	James E. Fuchs	180'4"
1955	Fortune Gordien	174'2 1/2"
1959	Alfred Oetzer	190'8 1/2"

### HAMMER THROW

1955	Robert Backus	195'11"
------	---------------	---------

### JAVELIN THROW

1955	Franklin Held	228'11"
1959	Buster Quist	231'3 1/2"

## DECATHLON

Year	Champion	Points
1955	Rafer Johnson	6,994
1959	David Edstom	7,254*

## WOMEN'S TRACK AND FIELD

### 60 METER DASH

Year	Champion	Time
1959	Isabelle Daniels	7.4*

### 100 METER DASH

1955	Barbara Jones	11.5*
1959	Lucinda Williams	12.1

### 200 METER DASH

1951	Jean Patton	25.3
1959	Lucinda Williams	24.2

### 400 METER RELAY

1951	Dolores Dwyer, Janet Moreau, Nell Jackson, Jean Patton	48.7
1955	Isabelle Daniels, Mabel Landry, Mae Faggs, Barbara Jones	47.0
1959	Isabelle Daniels, Wilma Rudolph, Lucinda Williams, Barbara Jones	46.4*

### HIGH JUMP

Year	Champion	Height
1955	Mildred McDaneil	5'6 1/2"
1959	Ann Flynn	5'3 1/4"

### BROAD JUMP

1959	Annie Smith	18'9 3/4"
------	-------------	-----------

### DISCUS THROW

1959	Earlene Brown (Mrs.)	161'9 1/2"

### JAVELIN THROW

1951	Amelia Albina	124'11 1/4"
1955	Karen E. Anderson	161'3"

## BOXING

### LIGHT WELTERWEIGHT—140 LBS.

Year	Champion
1959	Vincent J. Shomo

### WELTERWEIGHT—148 LBS.

1955	Joseph Dorando
------	----------------

### LIGHT MIDDLEWEIGHT—156.5 LBS.

1955	Paul Wright
1959	Wilbert McClure

### MIDDLEWEIGHT—165.5 LBS.

1955	Orville E. Pitts
------	------------------

### LIGHT HEAVYWEIGHT—178.5 LBS.

1959	Amos Johnson
------	--------------

### HEAVYWEIGHT—OVER 178.5 LBS.

1959	Allen Hudson
------	--------------

## EQUESTRIAN—MEN AND WOMEN

### Champion Record

### GRAND PRIX DE DRESSAGE

1959	Miss Patricia Galvin	2,213 points
------	----------------------	--------------

### THREE-DAY EVENT

1955	Walter Staley, Jr.	387.4 points
1959	Michael Page	-22.8 points

## FENCING—MEN AND WOMEN

### MEN'S EPEE

Year	Champion
1959	Roland Wommack

### MEN'S SABRE

1951	Nylas Tabor
1959	Allen Kwartler

### MEN'S FOIL

1955	Harold Goldsmith
1959	Harold Goldsmith

### WOMEN'S FOIL

1955	Maxine Mitchell (Mrs.)
------	------------------------

## GYMNASTICS—MEN

### FREE EXERCISE (CALISTHENICS)

Year	Champion	Points
1955	John Beckner	18.80
1959	Abraham Grossfeld	19.30

### RINGS

1955	Richard Beckner	19.05
1959	Jamile Ashmore and Abraham Grossfeld (tied)	19.00

### PARALLEL BARS

1955	John Beckner	19.30
1959	John Beckner	19.20

### HORIZONTAL BAR

1951	William Rotzheim	—

# U. S. OLYMPIC CHAMPIONS AND RECORDS

EACH nation takes pride in the athletes it sends to compete in the Olympic Games. Spectators root for athletes from their home countries. Because of this, comparisons are often made as to which nation's athletes won the most awards. But all who believe in and understand the Olympic movement know that such comparisons are of little import.

The main thing is that athletes from various nations do gather together under the five-ringed Olympic flag in friendly competition—and may the best men (and women) win!

In this spirit, the United States is proud of the athletes who won honors for themselves while wearing the red, white and blue.

Harry Hillman capturing 400-Meters crown in 1904.

'Skinny' had a lot of help

If the pass hadn't been good, Skinny would never have scored... and no one knows it better than he. In backyards and in gyms all over America, youngsters like Skinny and his pals learn the value of teamwork early.

Dr. James Naismith, basketball's inventor, put it well when he wrote, "In no

other game is cooperation so necessary."

Some day Skinny may head a business, spark a Community Fund drive, hold public office. No matter what fields he follows, he will find that his early training in teamwork is bound to pay big dividends — to himself, to his community, and to America.

# FLY TO ROME ON THE OFFICIAL AIRLINE OF THE OLYMPICS

ALITALIA'S NEW DC-8 <sup>ROLLS ROYCE,</sup>  
MOST POWERFUL JET ALOFT

STADIO OLIMPICO, a new wonder of Rome, seats 100,000. Opening ceremonies August 25. Other exciting events continue through September 11.

Double the pleasure of your trip to the Olympics by flying Alitalia's superb new DC-8 Rolls Royce jets! To the most advanced jetliner ever built by Douglas, Alitalia has added mighty Rolls Royce engines—most powerful in the sky! *Only Alitalia has this incomparable airliner* from New York to Rome, Milan, London. (Only 7½ happy hours to Rome!) What's more, you'll enjoy mouth-watering Italian cuisine . . . sunny Italian hospitality . . . and relax in the hands of million-mile pilots. Make your reservations today on Alitalia's new DC-8 Rolls Royce . . . most powerful, most luxurious airliner to the Olympics!

 **ALITALIA**   
The official airline for the Rome Olympic Games

## "Best Ever!"

That was the unanimous international verdict at the close of the VIII Winter Olympic Games at Squaw Valley in California. Even the Soviet Union, which is not always so tractable in such matters, joined warmly in the post-meet accolade.

All the nice things were said only because they were really so. There never has been a snow and ice carnival to compare, in competitive drama or grandeur of spectacle, with last winter's assembly of the world's best skiers, skaters and hockey players in the United States' Golden West.

The congregated athletes cut their fascinating capers in a glistening gem of a brand-new winter sports center carved specially for the occasion out of the rugged fastnesses of the majestic Sierra Nevadas. Estimates of the construction costs, shared by the states of California and Nevada, the Federal Government and private interests, ran as high as \$20,000,000.

No previous Olympic winter games ever received such wide attention, which undoubtedly was an added factor in their over-all success. On weekends, up to 50,000 spectators daily made their way to the remote scene over treacherous, snow-covered mountain roads. Weekday crowds were large enough, too, to raise live attendance for the eleven-day show close to the quarter-million mark.

On-the-scene viewers reveled at what they saw. So did countless millions of fireside experts, who followed the more important developments by television. The Columbia Broadcasting System, with confirmation from the leading rating services, jubilantly reported that few magic-lantern presentations have been more avidly received.

The sportsmen and sportswomen of Russia, and their officials, had reason to be happy over developments, aside from the comfortable living accommodations, the splendid training and competitive facilities, the perfection of the arrangements and the relatively unruffled conduct of the program.

By any preferred formula of unofficial scoring, the Soviet Union finished at the head of the thirty-nation field. Reaping their greatest harvest in the speed-skating events, the Russians won seven gold first-place medals, five silver second-place medals, and nine bronze third-place medals.

In each category, this was the highest bag. Germany captured four gold medals; the United States, Sweden and Norway three each; Finland, Canada and Switzerland two apiece and Austria and France one each.

On the 10-5-4-3-2-1 basis of scoring that is widely propagated by the major news service, the Soviet Union tallied 165½ points, to 71½ for Sweden, 71 for the United States, 70½ for Germany, 59½ for Finland, 53 for Norway, 35½ for Austria, 32 for Canada, 27 for France and 26½ for Switzerland.

With or without reference to these unsanctioned tallies it was a highly successful Winter Olympics for the United States. The highlight, from the Ameri-

can point of view, was the victory of a home-bred hockey team that had been rated no better than a third or fourth choice going into action.

The Soviet Union, winner at Cortina d'Ampezzo in 1956, and Canada, the cradle of the game, were expected to be the dominant rink powers. They had stalwart, seasoned players who knew hockey and each other.

The United States squad was rather haphazardly recruited from the colleges, the services and the loosely-organized amateur leagues in Minnesota, Michigan and New England.

However, once he had his boys together at West Point, Jack Riley, the Army coach who was in charge, molded them into an effective unit and breathed into them a fire of hope that burned brightly until their seemingly impossible mission had been successfully accomplished.

The unsung Americans qualified without difficulty for the six-team championship round-robin. In it, they successively defeated Sweden, 6-3; Germany, 8-1; Canada, 2-1; the Soviet Union, 3-2, and Czechoslovakia, 9-4.

The key Feb. 27 game with the Russians, presented nationally on television, has been described by countless observers as the "best hockey game I have ever seen." When the final result was posted, it evoked dancing in the streets such as rarely is seen in this country over an amateur sports event.

The heroes of the victory were Jack McCartan, for his staunch work at goal; Billy Christian, who scored twice, slamming home the winning marker at 14:59 of the third period after getting the puck on passes from young Tom Williams and his brother, Roger Christian, and Bill Cleary, who put the American team ahead at the outset. The agile, alert McCartan made twenty-seven saves, many of them spectacular.

In a dramatic aftermath, the United States team, in its final match with Czechoslovakia, profited from the gratuitous dressing-room advice of the Russian captain, Nikolai Sologubov, to use oxygen. Heeding this friendly rival counsel, the Americans stormed from a 4-3 deficit at the end of two periods to a smashing victory by scoring three goals within 67 seconds in the final period.

Attractive Carol Heiss of Ozone Park in Queens, N. Y., and nimble David Jenkins of Colorado Springs were the other United States gold medal winners.

The dedicated Miss Heiss, who had devoted 16 of her 21 years to preparing herself for this glorious moment, gave an almost flawless performance in capturing the women's figure skating title. Jenkins put on a breath-taking exhibition of free-skating virtuosity to keep the men's figure skating crown in the Jenkins family. His brother Hayes had won four years before.

The American girl skiers had hoped for even better but did mighty well in taking three silver medals in intense competition over breakneck downhill and slalom courses. Penny Pitou of Gilford,

Figure skater Carol Heiss, USA, enjoying The Star Spangled Banner in honor of her gold medal victory at Squaw Valley

N. H., finished second in both the downhill and giant slalom races. Betsy Snite of Norwich, Vt., was the runner-up in the slalom.

Bill Disney of Alhambra, Calif., glided home a surprisingly close second to the great Yevgeni Grishin, a double winner for the Soviet Union, in the 500-meter speed skating test.

The other American medalists, in third place, were Nancy and Ron Ludington of Roxbury, Mass., in the pairs figure skating; Barbara Ann Roles of Temple City, Calif., in the women's figure skating, and Jeanne Ashworth of Wilmington, Mass., in the women's 500-meter speed skating race.

There were anxious moments at the start of the games on Feb. 18, when a blinding blizzard struck Squaw Valley. But by the time the ceremonial parade was ready to start, the sun was shining brightly. The VIII Winter Olympics ran their colorful course smoothly for the rest of the way and at the end 740 participants and their supervisory brass chanted an appreciative "Well done!"

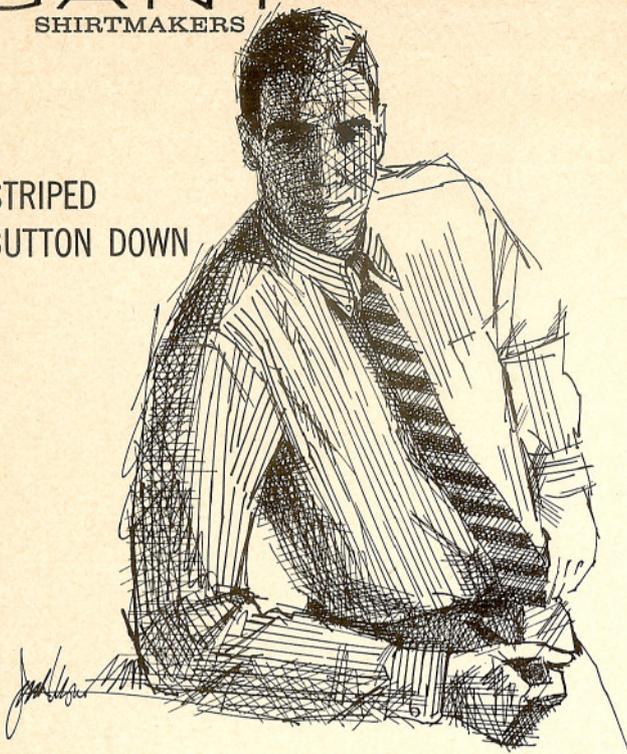

Spectating  
is more  
sparkling  
...with  
Canada Dry  
Ginger Ale...

Canada Dry is proud to provide especially purified water for all U. S. A. Olympic contestants . . . the same fine water that is used in the manufacture of all Canada Dry carbonated beverages.

# WINNING COMBINATION

... PERFORMANCE... SIZE... COMFORT... AGILITY

No compact car anywhere in the world combines so much in one car, at so low a price. ➤ **LARK PERFORMANCE** puts it way out front ahead of any of the others. And, it does it with economy. The Lark V-8 stretches gas consumption like a rubber band. It's big car performance in a compact car. ➤ **LARK SIZE** is ideal. It's three to fifteen inches shorter than any other U.S.A.-made compact. Though Lark overall length is shortest, its interior dimensions combine larger-car head-shoulder-hip-leg room. ➤ **LARK COMFORT** is delightful. The Lark seats six adults luxuriously. ➤ **LARK AGILITY** is terrific. Scoot, slip, scurry through traffic with verve and ease. The Lark's short bumper-to-bumper size and firm suspension make driving delightful, effortless fun. ➤ **DRIVE THE LARK** and see for yourself. Visit your Studebaker Dealer for a demonstration, today!

*LOVE THAT* **LARK** *BY STUDEBAKER*

BE **REALLY** REFRESHED!

Only Coca-Cola gives you the cheerful lift that's bright and lively... the cold crisp taste that so deeply satisfies! No wonder it's the real refreshment... anytime... anywhere! Pause... for Coke!

*Get Coke in King Size, too.  
Now available almost everywhere.*
