TRAINING AND RACING

FOOT TECHNOLOGY

PODULAR TECHNOLOGY

Your foot bends and flexes, shouldn't your shoes? Podular technology creates a midsole configuration that provides the most comfortable, natural motion ever experienced in a running shoe.

HYDROFLOW ST

Our premiere cushioning innovation. A unique fluid-flow design provides an incredible combination of shock absorption and stability.

FORE FOOT HYDROFLOW

Our premiere cushioning innovation. A unique fluid-flow design provides an incredible combination of shock absorption and stability. Located in the forefoot.

DIAGONAL ROLLBAR

Brooks' patented solution to excessive pronation, supports a runner's foot throughout the run by posting the medial side of the shoe with higher density compound.

SUBSTANCE 257

The problem of premature breakdown is solved with this next generation midsole material. Designed and developed exclusively by Brooks, this compound will last 10-15% longer than EVA.

THE SHOES

HYPERION

For the runner who is hard on their shoes and is looking for an extremely well cushioned trainer that lasts as long as they do.
