DATE: July 29, 1981

TO: Hank Lawson

SUBJECT: HP Track Team

Dear Hank:

Congratulations to you and all of the fine runners from the Hewlett-Packard Company for your second place finish in the Corporate Cup Relays. The competition, as I understand it, is improving markedly each year so it's especially noteworthy that you moved up from fourth to second.

We'd be delighted to have the team trophy on display in the new corporate office building. I'm not sure that the board room is the appropriate place since it gets very little traffic. It may be that some display area in another part of the building or the front lobby would be better.

We'll take that up with the facilities people as we move in over the next few months. I'll look forward to receiving the trophy at that time.

Best regards,

JAY:nt

cc: Gordon Brandt

TUE, JUL 28, 1981, 9:39 AM

Dear Mr. Young,

I have the proud honor of informing you that the Hewlett-Packard Track Team took 2nd place in the Corporate Cup Relays National Championships on July 18 - 19. Over 100 companies nationwide competed in this track meet and only Texas Instruments of Dallas, Texas finished ahead of us. We beat other companies such as General Electric, Pacific Gas & Electric and, my favorite, IBM. It was truly a team effort with individuals from Colorado, Oregon, and San Diego joining together with the Bay Area and Santa Rosa to help us win the team trophy. Last year we finished 4th, this year 2nd and I'm already planning ahead for next year to help improve our team.

Runner's World presented us with a second place team trophy which I feel belongs to more than just me or my division. I feel that a suitable home for this trophy would be in the new Corporate headquarters along with other joint efforts or special awards. I have talked with Gordon Brandt about a trophy case in the new building and he says that although one doesn't currently exist it has been planned. In the mean time, he suggested that the Board Room would be a suitable place. I would very much like to present this trophy to you and see it displayed in a location where all who helped achieve the trophy may see it. The trophy is currently being routed to the divisions that participated but will eventually end up back with me. At that time I would like to make the presentation.

I will be looking forward to hearing from you as to your inputs on these ideas and possible time schedules for implementing them.

Sincerley,

Hank Lawson

Claugus, making a comeback, runs

By Karl Laucher
Staff Writer

Stanford Stadium was about 80,000 people short of capacity Saturday, but every plank in the old fortress reverberated with the cheers of a new era.

All together now! Let's really hear it!

"Go Hewlet-Packard!"

"C'mon, Security Pacific!"

"Yea, Medicare Equipment Services!"

Genuine enthusiasm, too. The Corporate Cup Relays really do build corporate pride through friendly competition. Whether that increases productivity enough to pay for the entry fee probably is debatable.

Certainly the strong showing every year by PG&E hasn't done much for the utility bills.

California taxpayers, however, may be pleased to know that one of the fastest distance runners in the nation is on the payroll. Eileen Claugus, a lab technician in the State Department of Consumer Affairs, was a runaway winner in the only final event held Saturday, the women's 5-kilometer run.

Finals in the 14 other "national championship" events, from the men's 10-kilometer run (9:30 a.m.) to the executive relay (5:30 p.m.), will be held today.

Claugus, 26, making a comeback as a racer after finishing second in the World Cross Country championships at Cambridge, England, in 1972, won in a meet-record 16 minutes, 53.6 seconds. Claugus' bouncy, high-kicking gait may be something less than perfect for efficiency, but, oh, if only government bureaucracy ran so well.

Claugus, bothered by sore hamstrings sustained in a second-place effort in the San Francisco Marathon last week, wasn't among those who sprinted out of the stadium at the start, but she had gained the lead before she had gone a half-mile. She never looked back, but she could tell she was pulling away when she could no longer hear the breath or footsteps of other runners.

"I wanted to look back, but I didn't," she said. "Someone told me I was 100 yards ahead."

By the time she returned to the stadium, her lead was at 300 yards. The runner-up finished 41.6 seconds later.

Claugus, owner of the national high school mile record of 4:40.7 (set in 1973) and winner of the national junior girls cross country championship in 1971, was well into her rest for the 2½-mile pyramid relay qualifications when the last woman to finish the 5-kilometer race, 55-year-old Isabelle Dokouzian of San Francisco, tiptoed in at 50:09.36 in 180th place.

Dokouzian, participating for PG&E (where she's been employed 32 years), not only walked up the little hill 100 yards from the starting line, but most of the race. "I'm not a runner," she said with a smile. "That's for the eager beavers and the kids I like so much. But now that I've been involved I might start thinking about jogging."

Making a return appearance as an athlete at Stanford was Craig Johnson, a four-year letterman in tennis and a member of the national championship teams of 1973 and '74 (he also won the Mountain View tournament in 1976). The 27-year-old "institutional and retail" salesman for Montgomery Securities of San Francisco participates as the half-miler on the firm's relay teams.

When Johnson got the baton for the anchor leg of the master's relay, he was in last place by 50 yards. But a big kick on the final turn left another runner shaking his head in frustration. "It's competitive, so you've got to win the race, right?" Johnson said.

Among those not about to settle for last or next-to-last place is the U.S. Army team from Fort Ord, which

set a Class A record of 9:41.8 for the pyramid relay in the regional competition (which is divided into Class AA, A and B, depending on the size of the organization).

"We hope to go under 9:30," said Fort Ord coach, Capt. Dale Fletcher, who was the captain of the West Point cross country team in 1974. "More importantly, we want our second Fort Ord team (the Second Infantry) to come in second." The teams took a first and

off with women's

second in their heat races Saturday.

Fletcher is proud that Fort Ord is the first military base to be represented in the Corporate Cup and hopes there will be more in the future.

"They've had it here for the last two years and since it is right down the road from us we would be crazy not to take part," he said. "It's great to be able to give these kids something to do, and at a national level it's just a great experience for them."

5-kilometer title

"What tickles me," added Fletcher, "is that this team has been working together for six weeks, so we feel pretty close as a group."

"It's a nice way to pull members of the Army together."

It's nice to see a lot of these organizations pull together. When they're out there shouting, "Run, U.S. Postal," or "Good show, Delta Airlines," you get the feeling that productivity isn't everything.

Corporate

Cup

General Electric leads Corporate Relays

From Staff and Wire Reports

General Electric, which last month won its first regional title, will be among the teams entered in the fourth Corporate Cup Relays national championships Saturday and Sunday at Stanford University. More than 70 companies, represented by some 1,500 individuals, will take part in the two-day meet to determine the top major corporation team in track events. General Electric won the executive relay, the final event of the day, in the Region 1 competition June 27-28 at Stanford to edge defending champ PG&E for the title. Montgomery Securities was third after setting national records in the women's relay and the women's 800-meter team race. Qualifying for the national meet were General Electric, PG&E, Montgomery Securities, Hewlett-Packard, Lockheed, IBM, Pacific Telephone, Presidio of San Francisco, Standard Oil, Blue Cross, Bank of America, meet sponsor National Semiconductor, Bechtel and the Natomas Company.

Sportsfare

al, Michael Spinks has been best known as Leon's little brother. But on Saturday, Michael could finally emerge from the sometimes not-so-glamorous shadow of his famous brother. And he could own the World Boxing Council's light heavyweight championship as well, as he takes on champion Eddie Mustafa Muhammad in a 15-round title bout at the Imperial Palace Hotel in Las Vegas. "Leon's experiences have encouraged me to do as good as I can for myself," Spinks said. "This is my time. This is my show."

joins brother Leon, WBC welterweight champion and WBA junior middleweight champ Sugar Ray Leonard, former WBA bantamweight champ Leo Randolph, and Howard Davis, who fought James Watt for the WBC lightweight title.

TRAIL ISRAEL — Israeli swimmers captured three gold medals Thursday to push

ON HIS OWN — Since turning professional

ahead of their American competitors in the swimming finals at the 11th Maccabiah Games. Two American swimmers were first-place finishers, but the U.S. team trailed Israel by two gold medals, 8-6, after the third day of competition in the 10-day event. Eric Kaufman of Orinda set a Maccabiah record and won his second gold medal by edging Jack Salzman of Sarasota, Fla., and Richard Morris of Canada in the 200-meter men's backstroke. Kaufman finished in 2 minutes, 7.75 seconds and Salzman and Morris in 2:09.20 and 2:09.44, respectively. All three swimmers topped the previous Maccabiah record of 2:09.59.

BLOCKS MOVE — Siding with the Alabama state Legislature, a judge has blocked a challenge to a new law that would allow University of Alabama football coach Paul "Bear" Bryant to extend his coaching career beyond the state's mandatory retirement age of 70. But the ruling is expected to be appealed by the board of control of the Alabama Teachers Retirement System.

A Texas-sized investment pays off

By Karl Laucher
Staff Writer

Deep in the heart of Texas, there is this Texas-sized computer company named Texas Instruments. Those who know it call it T.I. for short.

T.I., the story goes, has its own track and field complex with a full-time coach. Furthermore, it has been said the only way to get a job at T.I. is to run the mile in less than five minutes.

Well, the truth sure has been stretched from here to Amarillo.

T.I., however, does have a gymnasium with locker room and shower facilities. It does have a 2½-mile running path around its main facility in Dallas and a quarter-mile path around the tennis courts.

"It's real nice," said Kathleen Matustik, a business programmer/analyst at T.I. and a member of the company running team, the Texas Striders.

The result of T.I.'s investment in athletics was much

in evidence again Sunday as it rounded up a second straight Corporate Cup national championship at Stanford Stadium.

With Matustik, 23, leading the charge, T.I. won three of the last four events to easily outdistance 111 class AA (large-division) teams with 101 points. Hewlett-Packard was second with 77 and General Electric third at 70.

Matustik ran a blazing half-mile leg on T.I.'s victorious women's relay team and, less than an hour later, finished first in the women's 800-meter team race to a 2:18 effort.

The last event, the executive relay (at the level of manager of managers or above and at least 30 years old), went to a group of T.I. bosses in 17:13.7, 11.4 seconds ahead of the General Electric brass.

Both of T.I. women's victories were Cup records, as was the executive relay mark. In fact, Cup records were the rule, rather than the exception.

In one event, the pyramid relay, the top five teams all finished under the old record of 9:22.8.

It was the 2¼-mile pyramid relay, made up of various distances for five runners (two of whom must be female), which produced the most exciting finish of the day. Pacific Gas and Electric, which took the early lead, appeared to be an easy winner until Bob Moffat of IBM made a move from deep in the pack.

Moffat, a systems analyst for IBM's Santa Teresa plant, brought the team from some 100 yards behind to within 20 when he handed the baton to another IBM systems analyst, Mary Lerner, for the final quarter-mile leg.

Lerner came within inches of pulling the plug on PG&E as she brought the crowd to its feet with a devastating kick in the stretch, only to be leaned out at the tape by PG&E's Carolyn Dunkak of Stockton.

PG&E's winning time of 9:15.2 should have not been 3 better than the 19:15.5 given IBM.

However, IBM, like many other billion-dollar companies in the Corporate Cup competition, could be many tenths, if not minutes, better should it be so inclined to nurture and cultivate the talent from its nearly 300,000 employees.

"I think it will catch on," said IBM's Bob Browne, who ran the third leg on the pyramid relay. "When we get ahold of it, we'll really be able to give it a good effort."

Of course, any company can use a talent like Tom Moreno of the Mostek Corporation of Carrollton, Tex.

Moreno, the 1980 Southwest Conference 5,000-meter champ for Southern Methodist, competed for T.I. last year (he was a summer employee), but this time he was a blue streak for Mostek.

Moreno lapped all but one or two runners as he opened the 6¼-mile open relay with a 13:47 three-mile effort and was back on the track again two hours later to win the men's 3,000-meter team race by 100 yards with a 8:27 clocking.

He has a best of 2:18.5 in the marathon and a 10-kilometer road race best of 28:35 and says he'll be looking for a spot on the 1984 Olympic team at either distance.

Also with ambitions larger than the Corporate Cup honors is Mitch Kingery of South Lake Tahoe, who won the men's 10-kilometer road race for Harvey's Casino with a 30:48 clocking. Kingery, 25, a former San Carlos High and College of San Mateo performer, collected \$1,500 as fifth place finisher in the Jordache Jeans Marathon last spring in Los Angeles and may enter the \$25,000 Nike Marathon in September.

Kingery hardly considers himself a professional, however. "I don't make a living off of this like a football player," he said. "I'm just a busboy."

Winning the masters division of the Corporate Cup 10K race was General Electric's Bill Meinhardt in 32:41.

Ex-Kent State star killed in argument

WARREN, Ohio (UPI) — A man and woman were being held in police custody today in the shooting death of Burrell McGhee, the most prolific scorer in Kent State University basketball history.

McGhee, 26, died shortly after being shot Friday night in an argument with a man in a grocery parking lot, officials said.

His sister, Lynette, said the former basketball star knew his male assailant, whom she described as the father of several children by another of McGhee's sisters. She said McGhee had told the man to stay away from his sister.

Police declined to release details of the shooting or confirm the sister's story.

McGhee, a schoolbus driver in Warren at the time of his death, at one time held or shared 19 Kent State basketball records. He was the Flashes' all-time leading scorer with 1,710 points in three seasons between

Steve Anderson, at left, and Ken McCrady

HP-ites **Steve Anderson** and **Ken McCrady** captured second place Aug. 15 – 16 at the Hobie Divisional Sailboat Championship at Heron

Lake, New Mexico. The second place qualified them for national competition at Sudden Valley, Washington Sept. 7. Ken will crew for Steve in the national race.

Steve and Ken also finish out the sailing season this month as commodore and vice commodore, respectively, of the Northern Colorado Hobie Company. The fleet of 50 Hobie Cat sailboats has met Tuesday evenings at Boyd Lake since May, veteran racers alternating with amateurs. The club is not officially sponsored by HP, but more than 20 boats are skippered by HP employees in Fort Collins.

Steve Anderson said the club was organized in 1979 with 12 boat owners to expose people to racing in a "low key atmosphere to prepare them for the official Hobie regattas

held in Colorado, Wyoming, Utah, New Mexico and occasionally Nebraska."

Steve, an industrial designer with ESO, took a first place this year in the Steamboat Springs race June 27-28 for the 18 ft. class A. Crewing for him was his wife Ruth.

Vice commodore Ken McCrady took a third place for the 18 ft. class A June 6-7 at Alcova, Wyoming. Alcova is also the site of Ken's 1980 division win for the 18 ft. class B fleet. Diana Thompson provided the crew help.

Ken is a DCD buyer and has worked for HP at Boise as well as Loveland and Fort Collins for a total of eight and one-half years.

Ken and Steve plan to introduce sail board racing to HP next year. Sail boards are one-man surf boards with an attached sail. □

R&D Section Manager **Geoff Chance** helped capture a second place road race medal at Stanford University in July, pushing HP to a second place finish behind Texas Instruments in the 1981 Corporate Cup National Championships.

Geoff and Ulrich Kaempf of HP Labs posted a combined time of 69:54 in the men's master's 10K road race. He also ran two miles in the executive relay that gained five points for the HP team and a sixth place. HP earned a total of 76 points in nine track events and four road races.

The HP team was made up of 33 runners from 11 divisions including Corvallis, Santa Rosa, Corporate, San Diego, Information Network, Santa Clara, Roseville, Data Systems, Microwave Semiconductor and HP Labs.

Texas Instruments rang up a top score of 101 while General Electric secured third place with 70 points. Pacific Gas and Electric Company and Mostek Corporation tied for fourth with 62 points each.

Although HP had no first place wins, the company's second place finish was gained by winning two seconds, two thirds and a number of fourths and fifths. Last year HP took fourth place overall.

Geoff, who recently turned 40 and moved up to the masters running class, completed the Boston Marathon in April with a time of 2:45. □

Runners find fun and love at Dallas race

by Gar Miller
senior editor

DALLAS — ARCO Oil and Gas' Bill Jennings and Barbara Harkins met at the Corporate Cup Regional Relays here in July 1979. Bill apparently took a shine to Barbara's Adidas and Barbara, you might say, fell right in step. Before long, they started running around together.

"About two miles every night," explains Bill, a budget analyst. "That doesn't count the two more miles I logged running back and forth to her house."

People who run together obviously have fun together and after two years of chasing one another, the two decided to tie the knot. The marriage ceremony, a traditional one except for a cake in the shape of a running shoe, will take place about the time this issue hits your mailbox. But Bill admits it would have been more interesting to hold the event at the same Corporate Cup Relays this July on the second anniversary of their meeting. The problem was finding a preacher who could keep up to them.

Love stories aside, Bill and Barbara were just two of some 47 Atlantic Richfield employees who came at their own expense by land, sea and air from as far away as Boston, Philadelphia, Los Angeles, a drilling rig off Louisiana and Montana to help carry the company honors in this year's regional meet. Described as a corporate olympics program of sorts, the meet features a torch bearer, pageantry, a wide range of athletic talent, and inevitably some controversy about the seriousness of it all.

Barbara Harkins and Judy Paine, from Plano, helped put the ARCO contingent together, but offered no company assistance in getting team members there. "What some of us did offer was free lodging, hospitality and a lot of fun," says Judy, who farmed out her three children to make room for a half-dozen ARCO athletes.

The ARCO people were aware of a *Wall Street Journal* story earlier this year alleging that some companies had recruited runners to work for them. One firm, in fact, advertised in a magazine for "engineers and runners."

"We're not interested in putting that much emphasis on it," explains Judy Paine. "We got together basically to have a good time. Our runners come because they enjoy it. We decided not to go to the finals in Palo Alto, but to concentrate instead on the regionals here where most of the better teams were entered. We hope to go to the finals in the future."

All the ARCO group did was finish second to powerhouse Texas Instruments and turn in easily its best performance in the three years of the races. For many, though, it wasn't the standings at the end of the day that mattered.

ON THE RUN — Carlos Washington, with ARCO Oil and Gas in Houston, wearing the ARCO shirt above, pulls away from the pack to win the mile leg of the open relay during the Dallas regional Corporate Cup Relays. Paul Keogh, from ARCO Performance Chemical Company in Philadelphia, put it best: "Being here with all the people from ARCO — from lower level employees to the executives — is what made it so great." Keogh, who paid the most to get here, was one of several who stayed at the Paine home and "carboloaded" Friday night on a spaghetti potpourri prepared by Mark Cocker from Denver and Boston's Dennis Westphal.

"We told Judy to get out of the kitchen, then threw everything in her refrigerator into a pot and poured it on some pasta," Westphal recalls.

Paine roused the crew next morning at 5 a.m. for a heavy schedule that ran from 7 until nearly midnight. Cocker, a geologist who had been exploring for precious metals in the Montana hinterlands the week before the race, found some silver and bronze at the track, recording a personal high in the 10-kilometer race and setting the pace for his teammates. Allen McDaniel, from ARCO Chemical in Channelview, Tex., and a veteran of Boston marathons, took time out from a family vacation to swing by and put in nine miles of work, including a valiant effort in the executive relay that guaranteed the team second place. Los Angeles' Fred Doubell, a word processor, also was a standout.

Making the commitment to be here wasn't easy for some, and many of the company's best weren't available. Nancy Thurman, an

engineer for ARCO Oil and Gas, was here, however, even though she'd spent the previous week on the J Storm IV drilling rig 40 miles off the Louisiana coast. "I didn't get my regular running in, but I did manage to run up and down some steps and jump rope on the heliport," she explains.

After the ARCO runners picked up their awards, they were anxious to get back to Judy Paine's house to work on the pizza and beer that ARCO Pipe Line President and fellow runner Horace Edwards helped provide.

There, amongst new friends, they shared in the camaraderie of the moment, rerunning the races, and getting a clearer understanding of what Atlantic Richfield and its people are all about.
