

## Whole Team XC Score

The SCVAL league will add a new team score called Whole Team Score to league meets this season. This score includes EVERY one of the runners on each team by averaging the time of every girl and boy on a team. These team averages are listed in order as an additional result. The purpose is to include ALL runners in a team result in addition to the traditional 5 per race. The result can also be looked at as a reflection of overall team capability. By using an average, team size should not bias scoring. There are just 2 categories- all girls and all boys. Coaches can choose whether to promote this new score to their teams if they feel athletes would benefit from knowing they are ALL contributing to their school's team score. Lastly, we will give grand-prix points over the 4 meets for a season-end grand total.

An example score is shown below using the boys results from 2021 SCVAL #2 @ Crystal Springs.
