## ATHLETIC LIBRARY

Spalding's Athletic Library is admitted to be the leading library series of its kind published in the world. In fact, it has no imitators, let alone equals. It occupies a field that it has created for itself.

The Library was established in the year 1892, and it is an admitted fact by many authorities that Spalding's Athletic Library has accomplished a great deal in America for the advancement of amateur sport.

The millions that read the Library during the year will attest to its value. A glance at its index will disclose the remarkable field that it covers. It is immaterial what the pastime may be, you will find in Spalding's Athletic Library a reference to it, either in a book devoted exclusively to that particular game or in some of the books that cover many sports.

It has been the aim of the editors to make the books *Official*, and they *are* recognized as such, all the important governing bodies in America giving to the publishers of Spalding's Athletic Library the right to publish their official books and official rules.

A glance at the names of the authors of the different volumes will convince the reader that the best men in each particular line, the men best qualified to write intelligently on each subject, are selected; and, as a result, there is not another series in the world like Spalding's Athletic Library series.

It is immaterial what new game or form of sport be conceived or advanced, it is invariably the aim of the publishers to have a book on that sport. In that way Spalding's Athletic Library is in the field at the beginning of the sport, follows it year in and year out and there can be no doubt whatever that the present popularity of athletic sports can attribute the same to the "backing" it has received from Spalding's Athletic Library.

## GROUP I.—BASE BALL

### NO. 1—SPALDING'S OFFICIAL BASE BALL GUIDE.

The leading Base Ball annual of the country, and the official authority of the game. Edited by Henry Chadwick, the "Father of Base Ball." Contains the official playing rules, with an explanatory index of the rules compiled by Mr. A. G. Spalding; pictures of all the teams in the National, American and minor leagues; official averages; reviews of the season in all the professional organizations; college Base Ball, and a great deal of interesting information. Price 10 cents. Ready April 1.

### NO. 202—HOW TO PLAY BASE BALL.

Edited by T. H. Murnane. New and revised edition. Contents: How to become a batter, by Napoleon Lajoie, James Collins, Hugh Jennings and Jesse Tannehill; how to run the bases, by Jack Doyle and Frank L. Chance; advice to base runners, by James E. Sullivan, President, A.A.U.; how to become a good pitcher, by Cy Young, "Rube" Waddell and Bert Cunningham; on curve pitching, by Cy Young, James J. Callahan, Frank Donahue, Vic Willis, William Dineen and Charley Nichols; how to become a good catcher, by Eddie Phelps, William Sullivan and M. J. Kittridge; how to play first base, by Hugh Jennings; how to play second base; by Napoleon Lajoie and William Gleason; how to play third base, by James Collins and Lave Cross; how to play short-stop, by Hernan Long; how to play the infield, by Charles A. Comiskey; how to play the outfield, by Fred Clarke; the earmarks of a ball player, by John J. McGraw; good advice for players; how to organize a team; how to manage a team; how to score a game; how to umpire a game; base ball rules interpreted for boys. Price 10 cents.

### NO. 223—HOW TO BAT.

The most important part of ball playing nowadays, outside of pitching, is batting. The team that can bat and has some good pitchers can win base ball games; therefore, every boy and young man who has, of course, already learned to catch, should turn his attention to this department of the game, and there is no better way of becoming proficient than by reading this book and then constantly practising the little tricks explained therein. Price 10 cents.

### NO. 232—HOW TO RUN THE BASES.

The importance of base running as a scientific feature of the national game is

becoming more and more recognized each year. Besides being spectacular, feats of base stealing nearly always figure in the winning of a game. Many a close contest is decided on the winning of that little strip of 90 feet which lies between cushions. When hits are few and the enemy's pitchers steady, it becomes incumbent on the opposing team to get around the bases in some manner. Effective stealing not only increases the effectiveness of the team by advancing its runners without wasting hits, but it serves to materially disconcert the enemy and frequently has caused an entire opposing club to temporarily lose its poise and throw away the game. This book gives clear and concise directions for excelling as a base runner; tells when to run and when not to do so; how and when to slide; team work on the bases; in fact, every point of the game is thoroughly explained. Illustrated with pictures of leading players. Price 10 cents.

### NO. 230—HOW TO PITCH.\*

A new, up-to-date book. The object of this book is to aid the beginners who aspire to become clever twirlers, and its contents are the practical teaching of men who have reached the top as pitchers, and who know how to impart a knowledge of their art. All the big leagues' pitchers are shown. Price 10 cents.

### NO. 229—HOW TO CATCH.

Undoubtedly the best book on catching that has yet been published. Every boy who has hopes of being a clever catcher should read how well-known players cover their position. Among the more noted ones who describe their methods of play in this book are Lou Criger of the Boston Americans and Johnnie Kling of the Chicago Nationals. The numerous pictures comprise all the noted catchers in the big leagues. Price 10 cents.

### NO. 225—HOW TO PLAY FIRST BASE.

No other position in a ball team has shown such a change for the better in recent years as first base. Modifications in line with the betterment of the sport in every department has been made at intervals, but in no other department have they been so radical. No boy who plays the initial sack can afford to overlook the points and hints contained in this book. Entirely new and up to date. Illustrated with full-page pictures of all the prominent first basemen. Price 10 cents.

## GROUP I.—BASE BALL—Continued

### NO. 226—HOW TO PLAY SECOND BASE.

There are so few men who can cover second base to perfection that their names can easily be called off by anyone who follows the game of base ball. Team owners who possess such players would not part with them for thousands of dollars. These men have been interviewed and their ideas incorporated in this book for the especial benefit of boys who want to know the fine points of play at this point of the diamond. Illustrated with full-page pictures. Price 10 cents.

### NO. 227—HOW TO PLAY THIRD BASE.

Third base is, in some respects, the most important of the infield. No major league team has ever won a pennant without a great third baseman. Collins of the Boston Americans and Leach of Pittsburg are two of the greatest third basemen the game has ever seen, and their teams owe much of the credit for pennants they have won to them. These men in this book describe just how they play the position. Everything a player should know is clearly set forth and any boy will surely increase his chances of success by a careful reading of this book. Illustrated. Price 10 cents.

### NO. 228—HOW TO PLAY SHORTSTOP.

Shortstop is one of the hardest positions on the infield to fill, and quick thought and quick action are necessary for a player who expects to make good as a shortstop. The views of every well-known player who covers this position have been sought in compiling this book, and it is offered as being the most complete book of its class ever produced. Illustrated. Price 10 cents.

### NO. 224—HOW TO PLAY THE OUT-FIELD.

Compiled especially for the young player who would become an expert. The best book on playing the outfield that has ever been published. There are just as many tricks to be learned, before a player can be a competent fielder, as there are in any other position on a nine, and this book explains them all. Illustrated with numerous page pictures of leading outfielders. Price 10 cents.

### NO. 231—HOW TO COACH; HOW TO CAPTAIN A TEAM; HOW TO MANAGE A TEAM; HOW TO UMPIRE; HOW TO ORGANIZE A LEAGUE.

A useful guide to all who are interested in the above subjects. Jimmy Collins writes on coaching; M. J. Kelly on captaining; Al Buckenberger on managing; Frank Dwyer of the American League staff, on umpiring; Fred Lake on minor leagues, and the editor, T. H. Murnane, President of the New England League, on how to organize a league. Price 10 cents.

### NO. 219—READY RECKONER OF BASE BALL PERCENTAGES.

To supply a demand for a book which would show the percentage of clubs without recourse to the arduous work of figuring, the publishers have had these tables compiled by an expert. No follower of the game can afford to be without this book. Price 10 cents.

## BASE BALL AUXILIARY

### NO. 231—MINOR LEAGUE BASE BALL GUIDE.

The minors' own guide. Contains pictures of leading teams, schedules, re-

port of annual meeting National Association of Professional Base Ball Leagues, special articles and official rules. Edited by President T. H. Murnane, of the New England League. Price 10 cents. (Ready May 1.)

### NO. 277—CRICKET; AND HOW TO PLAY IT.

By Prince Ranjitsinhji, the foremost cricketer of Great Britain. Every department of the game is described concisely and illustrated with full-page pictures posed especially for this book. The book is acknowledged by competent authorities to be the best book of instruction on the game ever published. Price 10 cents. (Ready in January.)

## GROUP IV.—LAWN TENNIS

### NO. 4—SPALDING'S OFFICIAL LAWN TENNIS ANNUAL.

Edited by H. P. Burchell, of the New York Times. Contents include a report of every important tournament played in 1906, embracing the National Championship, sectional and State tournaments; invitation and open tournaments; intercollegiate and interscholastic championships; women's national championships; foreign championships; indoor championships; official ranking for each year from 1885 to 1906; laws of lawn tennis; instructions for handicapping; decisions on doubtful points; regulations for the management of tournaments; directory of clubs; directions for laying out and keeping a court; tournament notes. Illustrated with pictures of leading players. Price 10 cents. (Ready in May.)

### NO. 157—HOW TO PLAY TENNIS.

A complete description of lawn tennis; a lesson for beginners and directions telling how to make the most important strokes; styles and skill of the experts; the American twist service; how to build and keep a court. Illustrated from photographs of leading players in action. Price 10 cents.

### NO. 279—STROKES AND SCIENCE OF LAWN TENNIS.

By P. A. Vaile, a leading authority on the game in Great Britain. Every stroke in the game is accurately illustrated and analyzed by the author. Acknowledged by experts to be the most complete book of instruction on the game ever published. As a means of affording a comparison between the American and the English methods of play, this book is extremely useful. Price 10 cents.

## GROUP V.—GOLF

### NO. 5—SPALDING'S OFFICIAL GOLF GUIDE.

The leading annual of the game in the United States. Contains records of all important tournaments, articles on the game in various sections of the country, pictures of prominent players, official playing rules, and interesting official playing rules and general items of interest. Price 10 cents. (Ready in March.)

### NO. 276—HOW TO PLAY GOLF.

By James Braid, the English Open Champion of 1906. A glance at the chapter headings will give an idea of

the variety and value of the contents: Beginners' wrong ideas; method of tuition; choosing the clubs; how to grip the club; stance and address in driving; the upward swing in driving; the top of the swing; the downward swing; finishing the stroke; the long ball; pulling and slicing; playing in a wind; brassy play; play with iron clubs; cleek shots; the iron; the running-up shot; the mashie; the niblick; putting; playing the round. Numerous full page pictures of Champion Braid in action add to the attractiveness of the book. The other contents include the official rules and other subjects of interest to golfers. Price 10 cents.

## THE RECORD ATHLETIC MEET OF THE YEAR.

In the spring of 1906 one hundred elementary schools in New York City held individual sets of field day games. This great series of athletic meets was planned by the New York Sunday World, which also gave the prizes. The games were held under the direction of the Public Schools Athletic League.

Two thousand silver and bronze medals were awarded, and about twenty thousand boys from the grammar grades of the school took part in the contests.

The playground parks, equipped with running tracks, on the East Side in Manhattan; fields in the outlying districts of the city; armories; the roof gymnasiums of some of the larger schools, and the tracks of various athletic clubs were used for these games.

At each school meet there were eight events on the programme, for which twenty medals were given. There was a fifty-yard race for juniors (boys under 13 years old), a 100-yard race for seniors (boys under 15), a 440-yard relay race for juniors, an 880-yard relay race for seniors, and high and broad jumps for both the younger and older boys.

The percentage of boys entering these games was very large, from many of the schools exceeding 50 per cent of the total enrollment in the grammar grades, while in some of the schools it went as high as 80 per cent, an unprecedented record in New York school field athletics.

The P. S. A. L. rule that only boys having a certain high mark in their school in scholarship and deportment could enter the games was strictly enforced.

In many cases the entire school—teachers and pupils—was present to witness the field day contests.

These games had a strong influence in creating and stimulating the athletic spirit among great numbers of boys in the New York public schools, and were also highly approved by the principals and teachers because of their effect in encouraging general good conduct and scholarship.

In the Grand Final Meet, held in October on the athletic field of one of the city parks, 2,100 contestants were entered. These were the two thousand boys who had won medals at the separate school meets, and one boy, more than 15 years old, from each of the one hundred schools, who competed in a special 100-yard dash.

In this final meet, the prizes were gold, silver and bronze medals, and a silk banner was given to the school scoring the greatest number of points in the various contests on the program.

This series of "Sunday World Field Days" will probably be repeated next year.

## ARCHERY IN THE U. S. A.

The twenty-eighth annual meeting of the National Archery Association was held at Boston, Mass., Aug. 21, 22, and 23, 1906. The next meeting of the association will be held at Chicago. The weather was very warm and showery upon the first and second days. The scores made at both the York and American rounds by Mr. Harry Richardson were close to the American record, and especially noteworthy in that the champion is just eighteen

years of age. This was his fourth national meeting, he having shot at each since 1903.

## FOREIGN RECORDS

### ENGLISH CHAMPIONS.

In 1879 two Championship Meetings were held, one being promoted by the Amateur Athletic Club, which had, up to that time, been in the habit of holding its meeting in the Spring, immediately after the Inter-University Sports, the other being held later in the Summer, under the management of the London Athletic Club.

NOTE.—In 1896 and 1897 a high wind spoiled all the times.

### OTHER FOREIGN RECORDS.

100 meters—10 24-100s. (electrical timing), Minoru Fujii, Imperial University of Tokyo, Japan, Nov. 14, 1902. Pole vault—3.66 meters (12ft. .094in.), Minoru Fujii, Imperial University of Tokyo, Japan, Nov. 11, 1905. Affidavits as to the genuineness of these records furnished by Dr. A. Tanakadate, Professor of Physics, Tokyo University, and Arata Hamao, president of the Athletic Association. Electrical timing is briefly as follows: An electric chronograph is run with two break circuit keys in it, one at the starting point and the other at the finish line. The key at the start is attached to the starter's pistol and is operated automatically by the blow of the gas at the nozzle of the pistol, so that the nearest possible instant of the emission of the signal sound is recorded on the chronograph. At the finish line another key is tied to a fine tape across the course and which breaks when the runner strikes it. The interval between the two breaks is taken as the time in which the runner covers the course. The chronograph registers the hundredth of a second.

Throwing the discus, Greek style—115ft. 4in. (35.17 meters), Jaervinen, Finland, at Olympic Games, Athens, Greece, May 1, 1906.

Throwing the javelin—175ft. 6in. (53.49 meters), Lemming, Sweden, at Olympic Games, Athens, Greece, April 26, 1906.

Rope climbing, 10 meters (32ft. 8in.), hand over hand—11 2-5s., D. Aliprantis, Greece, at Olympic Games, Athens, April 26, 1906.

Lifting bar bell with both hands—313 7-10 lbs. (142.08 kilos), D. Tofolas, Patras, Greece, at the Olympic Games, Athens, April 28, 1906.

Dumb-bell competition, lifting the dumb-bell with each hand separately—168 3-5 lbs. (76.550 kilos)—Steinbach, Austria, at Olympic Games, Athens, Greece, April 28, 1906.

Pole vaulting—3.90 meters (12ft. 9.54in.), Minoru Fujii, Imperial University of Tokyo, Japan, Nov. 10, 1906. A world's record; official proof to be forwarded.

## THE OLYMPIC GAMES OF 1906

---

The morning of April 22, 1906, was the dawning of a day long to be remembered. It was the opening day of the Olympic Games—a day long awaited by the Greek nation. All roads leading to Athens saw wagons wending their way to the city. It was not rare to see a band of peasants being drawn in a wagon to which was attached a donkey, an ox, and a mule. Every street leading to the Stadium was thronged with people, all good-natured and orderly. An excited murmur seemed to be through the city. Occasionally a cheer would be heard. Cabmen were brushing up their carriages in view of their coming afternoon trade and the fancy prices they were going to get.

As early as noon the carriages began to roll toward the Stadium and drop their human freight about 100 yards from the gate, for only the equipages of the royal family were allowed to cross the bridge of Illisos, the scene of greatest excitement. Thousands of people were standing around the bridge and near the entrance to the Stadium.

The main feature was the foustanellofori, or evzoni (the King's bodyguard), with their skirts and peculiar uniforms. They were stretched from the Stadium entrance in two long lines facing one another, leaving between the two lines a lane about ten feet wide through which the royal family passed. The bands of music were allowed to take their places in the Stadium. Thousands of soldiers were being marched in, not to keep order—that was not necessary—but as the Stadium is built between three hills, and as the top row of seats just reached those hills—where thousands congregated daily—it was found necessary to have the top row of seats guarded by soldiers, to prevent the people on the hills from stepping over the marble wall.

The placing of the soldiers was very interesting. What an imposing spectacle they made when they took their positions. Tramp, tramp, they would come marching up to the top row of seats. Here they were stretched, shoulder to shoulder, around the upper wall, thousands of them, with their peculiar uniforms, their heads just showing against the sky. One can imagine how many there must have been when it is known that the upper outer wall of the Stadium measures over one-third of a mile in circum-

ference. So picture a third of a mile of soldiers up in the skies—just like so many birds on the bough of a tree. It was a picture that many photographers were quick to recognize as unique.

When the guard was placed around the top of the Stadium the people were allowed to come in. There was a mad rush for seats. The management had the iron gates removed and thousands entered by holding their tickets over their heads. There were four entrances, two being for holders of tickets in the lower tiers of seats, the other two being for holders of tickets in the upper tiers, the latter ascending an outside marble stairway, built exclusively for them. Thousands could not buy tickets and joined the army of spectators that stood on the hills, on the bridge and along the streets, waiting to see the royal family arrive.

From the moment the royal family left the Palace in their carriages there was a long continued cheer that only ceased when they were comfortably seated in the royal box.

What an imposing spectacle it was as the royal family drove up between the bodyguard of evzoni under the arch of the Stadium gates. As they were escorted up the infield by the committee and jurymen, 50,000 people stood up to greet them. So loud were the cheers that the national airs could hardly be heard.

It was 3:15 p. m. when the royal party entered the Stadium. The crowds rose to their feet and were trying to get a glimpse of their majesties. His Majesty King George came first, wearing a simple admiral uniform, accompanying his sister, the Queen Alexandra of England. Then came His Majesty King Edward of England, accompanied by Queen Olga of Greece. They were followed by the Crown Prince Constantin and the Princess of Wales, the Prince of Wales and the Princess Sophia, Prince George and Princess Victoria, Prince Nicolas, Prince Andrew, the Princess Helen and the Grand Duke Boris, brother of Princess Helen.

The members of the royal family bowed to the right and left in recognition of the cheering and standing people in the Stadium. Flags were waved in a frantic manner. The fringe of soldiers around the top row of seats stood saluting, the naval officers stood back of the throne in salute. The cheers grew louder and louder—not only the people in the Stadium were cheering, but all Athens was cheering.

No wonder the King smiled and bowed to his people during his walk of two hundred yards through the mass of people who so madly cheered him.

The opening of the games was a sight that pleased not only the King, but the hundreds of foreign officials who had helped organize the Olympic Games in their respective countries, and had come to the city of Athens to see how the Athenians would celebrate their event. Never before in the history of athletics has there been such a sight. To think that close on to 100,000 people would be in and about the Stadium to witness the opening ceremonies!

As a contrast to the intense cheering there was complete silence when the Crown Prince stepped forward in front of the throne and in an impressive manner read the following address to the King:

**YOUR MAJESTY:** The committee, whose president I am, induced by the law that gave us the charge and the preparation of the Olympic Games, has invited to the Stadium, which was rebuilt in its ancient beauty by a patriotic Greek citizen, all the nations that regard athletics and gymnastics as the progress and inducement of civilization. We are grateful to-day, seeing that our pains have been crowned with success by the presence of international teams which are set before Your Majesty and the King of the strong United Kingdom of England.

Greece opens its arms to receive the best in rank of physical education, those who came here from all over the civilized world. The Stadium is broadened during these days in a universal Stadium, where the victory will spread its laurels on the heads of the best of the nations. In whatever country the victors will carry the prize of their worthy victory, we hope they will not forget that we have crowned their heads with laurels from Olympia, that have grown by the banks of Alphios. Let them not forget that they have been applauded and crowned as Olympic victors on the sacred ground of Athens by the descendants of ancient Greeks, who recognize as brothers those that the art of Athletics, the noble daughter of Greece, has brought up as victors. Leaving Athens as victors, let them consider themselves as other Athenians, since they have been crowned by Athenian prizes. Under such good omens, I take the honor to ask Your Majesty to proclaim the opening of the Olympic Games of 1906.

In response, the King arose and duly declared the Olympic Games of 1906 opened.

During all of this interesting ceremony, which was conducted in a dignified manner, the athletes from the different countries stood in columns back of the Crown Prince. Then came the parade of the contestants before the King, the bands of music of Levkas and of Piræus preceding them.

In this way first came the Germans, then the English, the Americans, the Australians, the Belgians, the Danish ladies, the Danish, the French, the Hungarians, the Italians, the Norwegians, the Swedes, and last the Greeks.

As they passed in front of the royal box each group saluted according to the custom of their own country and marched to their reserved seats in the left wing of the Stadium.

While the gymnasts were busy dressing themselves all the Philharmonic bands concentrated themselves in the depths of the Stadium and played the hymn of Samara. The full of inspiration and of great genius work was played indeed in a perfect way.

The programme of events consisted of gymnastic exhibitions presented by different countries. For this reason most of the infield was filled with gymnastic apparatus. The teams from Norway, Sweden, France, Denmark, Germany and Italy gave exhibitions. The feature of the day was the gymnastic work done by a class of Danish women, invited by the King and were guests at the Palace. Their balancing movements showed grace and poise; their apparatus work consisted of giant swings on the horizontal bars, the half lever on the rings, hand-stands on the parallel bars and wonderful vaults on the horse. They received great applause.

At six o'clock the gymnastic exhibition was concluded and it is doubtful whether one person had left the Stadium. When the royal party rose to make their triumphal exit the same reception was accorded them, if anything a little more pronounced. Every one of the 50,000 stood up—men uncovered their heads—the cheers echoed and re-echoed throughout the Stadium. After the royal party the people in a slow, orderly way left the Stadium by the four exits, but there was no crowding, or jostling, no jeering or laughter, for it was the opening of the Olympic Games. A Greek Festival had been inaugurated; the Greek people were part and parcel of it.

"Was there ever such an opening elsewhere? Could there be?" That's what many foreigners asked. The attendance! Where in the world could one collect an audience of at least 100,000 to witness the sight?

The answer is: "Nowhere but at Athens; classic Athens."

## **The Good Results of the Games**

The Olympic Games of 1906 will go down into athletic history as the most remarkable festival of its kind ever held. They exceeded in every way the successful Olympic Games of 1896, and are bound to produce good results, for the holding of

these games at Athens last year added a stimulus to sport on the Continent and has greatly increased the interest which will be taken in the future in athletic sports by all countries of the world. The scenes and incidents and everything in connection with the Olympic Games of 1906 made an impression that will never be forgotten and it is hoped that future Olympic Games will be up to the standard of the ones of 1906.

The Greek Committee, of which H. R. H. The Crown Prince is President, operating under a royal decree from King George, worked for many months perfecting the plans and arrangements for the games, and how well they succeeded is best told by the official reports, which speak for themselves.

It can be safely said that the Olympic Games of 1906 opened in a more auspicious manner than either the Olympic Games at Paris in 1900, or at St. Louis in 1904, and from the opening hour to the closing exercise, Athens enjoyed a festival the like of which has never been witnessed by the residents of any other city in the world. That they were a success can be attributed to the untiring efforts of His Majesty the King of Greece, the Crown Prince, Prince George, Prince Nicholas, Prince Andrew, and the Greek Committee. Their efforts during the entire Olympic period were untiring. They personally conducted as many of the athletic events as they could devote themselves to, so as to be here, there and everywhere, and made it, one might say, their personal duty to make all of the visitors and the officials from other countries feel as though they were welcome and their presence appreciated.

One of the first social functions, where all of the delegates, officials and others met, was at a luncheon given by H. R. H. the Crown Prince, at the Action Hotel. At least two hundred attended, the royal family being represented by H. R. H. the Crown Prince, Duke of Sparta, Prince George, Prince Nicholas and Prince Andrew. Following is the toast made by H. R. H. the Crown Prince:

"In the name of His Majesty the King. Delight of the eyes and great pleasure could be called the athletic feasts which have taken place during these last days. In these feasts, however, there is a deep lesson in the great emulation of the nations trying to surpass each other in the strength of the body and to show the benevolent effects of athletics by means of their first-in-rank athletes. We justly admire the victors and we partake of the applause that came out from the mouths of thousands of people for them. But we must not forget those who, by their devotion, have contributed and still contribute, not less than the victors, to the success of the games and to the progress of the

physical education that will revive the nations. The Princes and the governments whom you represent by means of their protection, the committees, the clubs and societies, whose members you are, by means of their enthusiastic zeal, have prepared the lively participation in the spectacle of these days. To you we owe the bringing together at the Stadium of Herodis of Atticus and of Averoff and at the other places of the games, of the groups of strong-bodied young men for whom we clap the hands.

"I consider, therefore, but fair to raise my cup for you, as representatives of the protectors of athletics, by means of which the bodies are strengthened, the bodies that adore the nations during the times of peace and protect their rights at times of danger. I therefore drink to the health of all of you and the health of the nations whom you represent."

That the games of 1906 were vastly superior to the games of 1896 the members of the Royal Family admitted. That was at the beginning, and at the time they were all very well pleased with the entry received and the number of spectators.

To the visitor from an athletic country, particularly America, the one thing which will long be remembered is the Stadium. Words can hardly describe the impression the Stadium makes on one as he enters its gates. Tiers of white marble seats go to the clouds. In size and dimension it is unsurpassed; in form and construction unequalled. There is a grandeur about it that impresses one. Certainly there is no place in the world like it for the holding of Olympic Games.

The Olympic Games, as we all know, comprised a great many events, the Stadium events, of course, being considered by a great many, the Olympic Games, for it is to see these events that the populace go. These events are used as comparison in all records known as Olympic records.

There has been some criticism in relation to the claims of the Americans. The Americans have claimed absolutely what they accomplished. America sent a team for the Olympic Games as they had been understood at Athens in 1896, at Paris in 1900, and at St. Louis in 1904, and at no time did they claim that America won a canoe championship, a revolver championship, a gymnastic championship, or a boating championship; they did not make an entry in these events. America entered its team for athletics, and all claims made by Americans have been for the athletic events, as the word is understood, and these events took place in the Stadium. In other words, America excelled the world athletically, just the same as France excelled in swordsmanship, the Swiss in shooting, Italy in boating and bicy-

cling, and the Danes in foot ball, and the French are certainly entitled to a great deal of credit for their all-round showing in all other than the track and field athletic events.

We can see that the question of events will have to receive great consideration from the Greek and the International Committees, for I really believe that these Committees should establish the events and have them lived up to; for instance, during the Olympic Games at Paris one individual won the Olympic Championship for fishing in the Seine for live fish. At St. Louis, in the same way, and under Olympic sanction, there was a roque championship, a sport which is unknown in other countries; and speaking of scoring points in championships, if one takes in all events held under the Olympic series, the St. Louis Olympic Games furnish some interesting data, for the committee, under instructions from the International Committee, had about 390 individual Olympic events contested. Out of these about fourteen were won by foreigners; and, scoring on the point system, America scored close to 3,500 points in these Olympic events at St. Louis; in other words, more points by many hundreds that was scored by all other nations at Athens in 1896, and Athens in 1906. Nevertheless, we publish in this volume a complete record of all Olympic events that were held at Athens. The final classifications will prove interesting.

By classification, in one event—the all-round gymnastic championship—France had four men who received first prizes, Germany four, Italy three, and Bohemia one. While that, perhaps, is a good system of scoring, it would be much better if a conclusion could be arrived at as to the real championship, not have it divided among fourteen men, and allow certain countries to score four first prizes in one event. If fourteen men were tied for first place or one was equal to the other, the method for scoring should be to divide the points, and each man would thus be credited with one-fourteenth of a championship; or, the fourteen should go still further and have a real champion. In another classification—gymnastics—France received three first prizes, Italy three, Germany two, and Hungary one.

## **President Roosevelt's Greetings**

To have been a member of the American Olympic team was an honor that any athlete can justly feel proud of, and the fact that our President, the Hon. Theodore Roosevelt, had accepted

the Honorary Presidency of the American Committee, was a tribute to all who were connected with this glorious victory.

After the games were over and the American victory had been heralded over the world and President Roosevelt had been advised how our athletes performed, the receipt of the following cablegram pleased all the boys immensely :

Washington, May 3, 1906.

Mr. James E. Sullivan, American Commissioner, Olympic Games.

Hearty congratulations to you and the American contestants. Uncle Sam is all right.

THEODORE ROOSEVELT.

The message was read to the athletes at a dinner at the Hermes Hotel, and three long cheers were given for our athletic President. The President again showed his deep interest in the success of the team, as is shown by the following telegram which was received as soon as the team landed from the steamer Republic upon their return to New York :

Washington, May 25, 1906.

Mr. James E. Sullivan, New York.

Let me heartily congratulate you and all the members of the team upon their admirable showing. We are all proud of the record they made.

THEODORE ROOSEVELT.

It is the intention of the Jamestown Exposition to encourage amateur sports. On July Fourth, 1907, the All-Around Championship of America will be held. During the first week in August the Amateur Swimming and Water Polo Championships of the Amateur Athletic Union of the United States, open to all amateur swimmers of the world, will be held. This will include intermediate, junior, and senior events. During the first week in September the National Amateur Athletic Union Track and Field Championships—Junior and Senior—open to all amateurs of the world will be contested.

Aside from these established features, there will be college championships, scholastic championships, A.A.U. basket ball championships, military carnivals, dual meets between the Army and the Navy, and perhaps a dual meet between West Point and Annapolis.

For full and complete information in relation to the Jamestown Exposition apply to James E. Sullivan, Honorary Director of Athletic Events, Jamestown Exposition, Norfolk, Va.

A. C. Spalding & Bros.  
Gentlemen:-I have tested  
the 16-pound hammer you made  
under my direction and found  
it to be perfect. I find it  
easier to stay in circle when  
manipulating, and owing to its  
ball-bearing construction it  
gets less resistance from the  
air. Because the head swivels  
and in fact fills the bill com-  
pletely should be. I will use  
it in all competitions and will  
recommend same to those wishing  
to excel in hammer throwing.  
You have my permission to use  
my name. Yours respectfully,  
*John Flanagan*

## THE SPALDING YOUTH'S DISCUS

Officially adopted by the Public Schools Athletic League.

TO satisfy the demand for a discus that will be suitable for the use of the more youthful athletes, we have put out this season a special discus, smaller in size and lighter in weight than the regular Official size. This Youths' Discus is made in exactly the same way as the Official style, merely differing in size and weight.

## Foster's Patent Safety Hurdle

**FOSTER'S SAFETY HURDLE AT THE WORLD'S FAIR, ST. LOUIS.**

**T**HE frame is 2 feet 6 inches high, with a horizontal rod passing through it 2 feet above the ground. The hurdle is a wooden gate 2 feet high, swinging on this rod at a point 6 inches from one of the sides and 18 inches from the other. With the short side up it measures 2 feet 6 inches from the ground, and with the long side up, 3 feet 6 inches. The hurdle can be changed from one height to the other in a few seconds, and is held firmly in either position by a thumb-screw on the rod. It would be hard to conceive any device more simple or more easily handled than this. The invention was used exclusively at the Olympic Games at St. Louis and has met with the approval of the best known physical directors and trainers of the country.

# The Spalding "Highest Quality" Sweaters

We allow four inches for stretch in all our Sweaters, and sizes are marked accordingly. It is suggested, however, that for very heavy men a size about two inches larger than coat measurement be ordered to insure a comfortable fit.

Made of the very finest Australian lambs' wool, and exceedingly soft and pleasant to wear. They are full fashioned to body and arms and without seams of any kind. The various grades in our "Highest Quality" Sweaters are identical in quality and finish, the difference in price being due entirely to variations in weight.

Our No. AA Sweaters are considerably heavier than the heaviest sweater ever knitted and cannot be furnished by any other maker, as we have exclusive control of this special weight.

No. 110 Pupil's Glove

Showing Padding on Wrist and Forearm

## Spalding Pupil's Boxing Glove

Acting on the suggestion of one of the most prominent athletic officials in this country, we decided recently to get up a boxing glove that would be an aid to the pupil learning to box. This glove is additionally padded on the forearm and over the wrist, to prevent that soreness which is one of the most discouraging features following a brisk lesson in the art of "blocking." The glove part is well padded with curled hair, the leather being best quality soft tan.

**I**N all athletic contests the implements and apparatus must conform to the official rules as laid down by the governing bodies of the various sports, the object being to enable all contestants to compete under uniform conditions and with the same kind of an implement, for a record in any sport will not be allowed unless the official implement is used. That is why Spalding implements are always selected, because they never vary in weight measurement, but invariably conform to the rules. . . .

**T**HE above illustration shows the Stadium at St. Louis, in which the Olympic Games of 1904 were held. The field, which was designed and equipped by A. G. Spalding & Bros., was declared by experts to be the most perfect outdoor athletic plant ever built.

**OFFICIAL** IN all athletic contests the implements and apparatus must conform to the official rules as laid down by the governing bodies of the various sports, the object being to enable all contestants to compete under uniform conditions and with the same kind of an implement, for a record in any sport will not be allowed unless the official implement is used. That is why Spalding implements are always selected, because they never vary in weight or measurement, but invariably conform to the rules. . . . .

**OFFICIAL** THE officials of the Louisiana Purchase Exposition, recognizing the importance of the OLYMPIC GAMES and the value of establishing authentic Olympic records, selected Spalding Athletic Implements for exclusive official use in connection with the Olympic Games (held in the Stadium of the Exposition, from May to November) because of their acknowledged superiority, reliability and official standing. For over a quarter of a century A. G. Spalding & Bros.' implements have been officially used.\*

## Tom Hayward in a New Role

A rumour is in circulation that that prince among professional batsmen, Tom Hayward, is about to retire from first class cricket. It is almost needless to state that this is not so. What probably gave rise to the rumour is the announcement that Messrs. A. G. Spalding & Bros., 53-55, Fetter Lane, E. C., with much business acumen and enterprise, have engaged the Surrey "idol" as manager of their cricket bat department. Messrs. Spalding will make a special feature of this department, and all the bats in stock will be carefully selected and bear the name of Tom Hayward. Surrey cricketers especially will be pleased to learn that rumour has again proved herself a lying jade, for the "record breaker" of 1906 emphatically states that his engagement with Messrs. Spalding will in no way affect his cricketing career.

We issue a special catalogue devoted to our line of cricket goods, including the celebrated Tom Hayward "Century" Bat and the most complete assortment of general cricket equipment listed by anyone. ✻ A copy of this cricket catalogue will be mailed to anyone on receipt of request. ✻ Correspondence with organized clubs especially solicited.

In the recent great World's Championship Games in Chicago between the Chicago Nationals and the Chicago Americans the Spalding League Ball was used.

**I**N addition to the different American adoptions, the Spalding Official League Ball has been made the official ball by the governing Base Ball Associations of Mexico, Cuba, Canada, Australia, South Africa, Great Britain, Philippine Islands, Japan, and, in fact, wherever Base Ball is played. The Spalding League Ball has received this universal adoption because of its well established reputation for uniformity and high quality, but the special object of such adoptions, from the players' standpoint, is to secure absolute uniformity in a ball, that will prevent unfair "jockeying" with an unknown ball, and make National and International Base Ball contests possible, and at the same time make the records of players of value, and uniform throughout the world, which can only be secured by standardizing one well known ball.

**The Spalding Official League Ball** is used by Yale, Harvard, Princeton and all prominent college teams. The soldiers and sailors in the United States Army and Navy use it exclusively. In fact, the Spalding League Ball is in universal use wherever Base Ball is played.

Once in a while a minor league will experiment for a short time with some other ball, but invariably returns to the Spalding League Ball, which has now become universally recognized

# Athletic Training For Schoolboys

(Spalding's Athletic Library No. 246)

By GEO. W. ORTON

This book is the most complete work of its kind yet attempted. The compiler is Geo. W. Orton, of the University of Pennsylvania, a famous athlete himself and who is well qualified to give instructions to the beginner. Each event in the intercollegiate programme is treated of separately, both in regards to method of training and form. By following the directions given, the young athlete will be sure to benefit himself without the danger of overworking, as many have done through ignorance, rendering themselves unfitted for their task when the day of competition arrived. Illustrated with numerous full page pictures of leading athletes in action.

# DURAND-STEEL LOCKERS

## Lockers That Last

WOODEN lockers are objectionable because they attract vermin, retain odors and can be easily broken into, and are dangerous on account of fire.

Lockers made from wire mesh or expanded metal afford little security, as they can be easily entered with wire cutters. Clothes placed in them become covered with dust; and the lockers themselves present a poor appearance, resembling animal cages.

### Durand-Steel Lockers

are made of high-grade steel plates, and are finished with gloss-black furnace baked (400°) Japan, comparable to that used on hospital ware, which will never flake off nor require refinishing, as do paints and enamels.

Durand-Steel Lockers are usually built with doors perforated full length in panel design, with sides and backs solid. This prevents clothes in one locker from coming in contact with wet garments in adjoining lockers, while plenty of ventilation is secured by having the door perforated its entire length, but if the purchaser prefers we perforate the backs also.

## CHURCHILL & SPALDING

470 Carroll Avenue :: CHICAGO, ILL.

## Who are A. G. Spalding & Bros.?

Albert G. and J. Walter Spalding commenced business March 1st, 1876, at Chicago, under the firm name A. G. Spalding & Bro., with a capital of \$800. Two years later their brother-in-law, William T. Brown, came into the business, and the firm name was then changed to A. G. Spalding & Bros.

The business was founded on the Athletic reputation of Mr. A. G. Spalding, who acquired a national prominence in the realm of Sport, as Captain and Pitcher of the Forest City's of Rockford, Ill. (1865-70), the original Boston Base Ball Club (Champions of the United States, 1871-75), and the Chicago Ball Club (1876-77), first Champions of the National League. He was also one of the original organizers, and for many years a director, of the National League of America, the premier Base Ball organization of the world. Mr. Spalding has taken an important part in Base Ball affairs ever since it became the National Game of the United States at the close of the Civil War in 1865. The returning veterans of that War, who had played the game as a camp diversion, disseminated this new American field sport throughout the country, and thus gave it its national character.

Base Ball Goods were the only articles of merchandise carried the first year, the total sales amounting to \$11,000. Gradually implements and accessories of Athletic Sports were added, until the firm now manufacture the requisites for all kinds of Athletic Sports. Originally the firm contracted for their supplies from outside manufacturers, but finding it impossible, by this method, to keep the standard of quality up to their high ideals, they gradually commenced the manufacture of their own goods, and by the acquisition from time to time of various established factories located in different parts of the country, are now able to, and do manufacture in their own factories everything bearing the Spalding Trade-Mark, which stands the world over as a guarantee of the highest quality.

There are over three thousand persons employed in various capacities in A. G. Spalding & Bros.' factories and stores located in all the leading cities of the United States, Canada and England. A capital of over \$4,000,000 is employed in carrying on this business, and the annual sales exceed the total combined annual sales of all other manufacturers in the world making a similar line of goods.

A. G. Spalding & Bros. have always taken a leading part in the introduction, encouragement and support of all new Sports and Games, and the prominence attained by Athletic Sports in the United States is in a very great measure due to the energy, enterprise and liberality of this progressive concern. They were the pioneers, and in fact the founders, of the Athletic Goods Trade in America, and are now universally recognized as the undisputed Leaders in the Athletic Goods line throughout the world.

The late Marshall Field of Chicago, America's greatest Merchant, speaking of the business of A. G. Spalding & Bros., said: "I am familiar with its early career, growth and development, and when I compare its unpromising outlook and the special field for its operations that existed at its inception in 1876, with its present magnitude, I consider it one of the most remarkable mercantile successes of the world."

The millions of Athletes using them, and the thousands of Dealers selling them, attest to the High Quality of Spalding's Athletic Goods, and they must determine the future history of this concern.
