Dear Bert,

I might be interested in purchasing a limited amount of stock in Track and Field News if your plans to that effect materialize. I agree with you when you say there is a real, untouched potential in the field. To ~~amazed~~ a person educated to appreciate ~~track~~ the sport, ~~the~~ track is just as interesting as baseball. It's just a matter of educating more people to appreciate track I guess.

I'll send you outstanding college and high school marks from this area whenever I hear of them. Of course, you're not obligated to use everything I send. Just use whatever you choose.

Sincerely,

*Jerry*  
Jerry Harr
