

Chip Instructions:

Athletes: Do not go anywhere near the finish line if you have a chip on your person.

Coaches: Do not put chips in your pockets - you will forget and if you go anywhere near the finish to "help" or "cheer", those chips will be read creating incorrect results.

If you use an "extra" chip for an athlete that lost/forgot their chip, you must get me the information.

If bib #'s are used be sure you have the corresponding one as your chip (and bring your own safety pins).

Four cones with red "caution tape" will identify the finish area - you must cross the finish "pad" for your chip to be read.

Once athletes finish, clear the finish area ASAP.

As soon as your race is over, remove your chip and return it to the team using the process your coach has set up. Then you don't have to worry about the chip being accidentally read for another race. DO NOT go near the finish area if you have a chip on (except for finishing).

Coaches: while your athletes will be using the same chip throughout the season, I recommend a policy of passing out and returning chips at each meet, as we do not want to risk our athlete forgetting his or her chip.

The link below shows how you should wear the chip:
lynbrooksports.prepcaltrack.com/ATHLETICS/XC/wearchip.pdf

And a video link on how to wear the chip:
